WORK EXPERIENCE

TATA TECHNOLOGIES

Dot Net Developer

05/2022 - Present

India

Achievements/Tasks

- In-depth knowledge of ASP.NET Web forms and .NET as a whole.
- Created a single database from several databases, each of which depended on the admin to manage it. When several databases with various database formats are combined, the database format is standardized.
- Designing new databases and data schemas for the high-volume single page application improving data integrity and execution efficiency.
- Developed and worked with Front-end, Back-end and Databases which gave the ability to understand the entire spectrum of processes in any big project that covers the initial business analysis to the release of the product.
- Working in close connection with the business clients and now understand their point of view when a task is assigned.
- Working on projects that had almost a million lines of code, offered a lot of insight into the value of the project's design and how expensive a single error can be if it is disregarded or discovered too late.
- Establishing robust, clear coding standards that enhance the maintainability and uniformity of the entire code base.

EDUCATION

B.E. Computer

Savitribai Phule Pune University(SPPU)

05/2015 - 06/2021

India

Bachelor in Computer Engineering

- CGPA - 7.0

SKILLS

JAVA
