## EDUCATION

### Software Development Engineer in Test

Masai  
April 2024-present

### Bachelor of Commerce in Programming

Delhi University School of Open Learning  
June 2019 - April 2021

## TECHNICAL SKILLS

API | RESTful APIs | HTML5 |  
JavaScript

## SOFT SKILLS

- Problem Solving
- Teamwork
- Effective Communication
- Time Management

## INTERESTS

Listening to Songs | Cricket

## CERTIFICATES

- Construct Week Project Masai  
Successfully participated in the Construct Week Project in Masai.
- Construct Week Project Masai  
Successfully participated in the Construct Week Project at Masai.

## PROFESSIONAL SUMMARY

Exceptional Software Development Engineer in Test skilled at designing and executing test scenarios, identifying algorithmic and logic errors, and collaborating with development teams. Proficient in Python, API testing, and documentation. Adept at leveraging Generative AI and learning new tech stacks swiftly.

## WORK EXPERIENCE

### R1rcm

Analyst

August 2023 - February 2024

#### Job responsibilities:

- Conducted detailed financial analyses ensuring accurate revenue projections and collections, adhering to various healthcare reimbursement models.
- Identified and rectified variances through the application of sophisticated healthcare reimbursement methodologies, ensuring optimized revenue estimations.

## PROJECTS

### 1. HealthHub Project (Manual Testing/Automation Using Cypress)

- Created comprehensive test plans and executed both manual and automated test scenarios using Cypress.
- Developed detailed bug reports, including clear reproduction steps to facilitate prompt bug resolution.
- Collaborated with developers to understand application features and ensure quality.
- Documented test cases and generated summary reports to track the progress and findings.

### 2. Dummy Json/Carts (API Testing using Rest Assured)

- Validated multiple API endpoints for an e-commerce application using Rest Assured and Cypress.
- Executed frontend tests with Cypress and conducted backend validation with Rest Assured, ensuring comprehensive coverage.
- Implemented the Page Object Model (POM) to improve the efficiency of API testing.
- Documented found issues with clear steps for reproduction and tracked resolution progress.

### 3. Tutorials Ninja (Automation using Selenium)

- Developed and executed automated test scripts for an e-commerce platform using Selenium and the Page Object Model.
- Performed key user operations like login, registration, and product search manually, and automated them with Selenium.
- Utilized TestNG, property files, explicit waits, and assertions to ensure test reliability.
- Generated detailed Extent Reports to document test results and captured screenshots for bug reporting.
