Professional Summary

Driven SDET/QA with expertise in automation, algorithm-focused testing, and documentation. Proficient in Python and manual testing, with strong problem-solving skills and ability to learn new tech stacks quickly. Effective in collaborative environments and skilled in using generative AI for innovative solutions.

Projects

Tutorials Ninja Website, Manual Testing [Github Repo](#) [Link](#)

Excel

- Authored and executed detailed test cases for critical functionalities such as 'Login' and 'Order Functionality' to ensure a seamless user experience.
- Designed comprehensive test scenarios and cases to validate user flow and error handling.
- Collaborated in defect identification and resolution to enhance system reliability.

Tutorials Ninja Website, Cypress [Github Repo](#) [Link](#)

Cypress JavaScript

- Designed and executed end-to-end test scenarios using Cypress to identify and fix software issues on the Tutorials Ninja website.
- Collaborated with the development team to understand user flow requirements and automate the testing process.
- Documented and reported identified issues with detailed steps for reproduction to aid in bug resolution.
- Developed test plans and test cases focused on algorithm-intensive components of the website.
- Worked closely with developers to ensure quick resolution of bugs and enhance website functionality.
