- **Project Details:**

1. **Project Name: Production Monitoring Application**

- **Technology:** Asp . net MVC, JavaScript, JQuery
- **Database:** Azure DB, SQL Server
- **Description:** Provides live updates on the status of each machine and production line. Allows users to view real-time metrics such as production rates, downtime, and overall equipment effectiveness (OEE). Monitors production quality in real-time, minimizing defects and ensuring product consistency.

2. **Project Name: Tax Invoice**

- **Technology:** Asp .net MVC, JavaScript, JQuery
- **Database:** Azure DB, SQL Server
- **Description:** Enables users to easily create invoices, including essential details such as Company name, contact information, product or service descriptions, quantities, prices, and applicable taxes. Automatically calculates totals, including taxes, based on predefined tax rates and rules. Automates the calculation of taxes, discounts, and other relevant charges to minimize errors and enhance accuracy.

3. **Project Name: Bill Of Material**

- **Technology:** Asp MVC, JavaScript, JQuery
- **Database:** Azure DB, SQL Server
- **Description:** Supports the creation of a hierarchical structure for products, breaking them down into assemblies, subassemblies, and individual components. Bill of Materials Project serves as a crucial component in the manufacturing and production lifecycle, providing a structured and organized approach to managing the materials and components required to build products.
