## ***Academic Projects***

---

### ***Project Name : E-commerce web site***

We have created above project with three group members. We have created a E-commerce web site. We have provided feature to buy a product, view a product details etc. Customer can view different type of product under this web site. Customer can purchase any product with online payment option.

### ***Project Name : Measurement of water level indicator using ultrasonic***

We have created above project with three group members. In this project we measure the water level using ultra sonic sensor. During verification we found that if water level is less than temperature is increased whereas water level is more than temperature is increased.

### ***Project Name : Data Leakage Detection***

In data leakage detection we have two parts agent and distributor. We create a login page for agent and distributor. Registration page is created for distributor and agent. Agent of distributor send a file to each other. During sending file by agent to distributor or vice versa if the file not received to receiver it means the hacker hack the file than the hacker will get dummy file and email will received to sender regarding hacking of file.

### **Certification:**

.Net Certification - Aptech institute
