with IBM Power systems,
Coursera

PROFESSIONAL SUMMARY

Adaptable Full Stack Web Developer with expertise in the MERN stack, skilled in implementing efficient server-side APIs and frontend components. Highly proficient with React.js and MongoDB, showing strong problem-solving abilities. Possesses a quick adaptability to new tech stacks, including Generative AI, ensuring seamless project execution.

WORK EXPERIENCE

NikoMedia

Full Stack Web Developer | September 2024 - January 2025

Job responsibilities:

- Architected and deployed scalable ERP and CMS solutions, leading to a 40% improvement in client workflow, aligning with the job's emphasis on enhancing development processes and ensuring software excellence.
- Implemented comprehensive performance optimizations achieving perfect Lighthouse scores across multiple e-commerce platforms, which demonstrates proficiency in frontend technologies and optimizing web applications.
- Led technical decisions and mentored team members, focusing on adopting best practices for Next.js and GraphQL, highlighting strong problem-solving and communication skills essential for collaborating with team members.

PROJECTS

1. Speed-Talk — Internal Communication Platform

React | NextJS | Responsive Web Design | RESTful APIs | Prisma | webRTC | SocketIO | Livekit | Tailwind CSS

- Developed a full stack communication platform using React, NextJS, Prisma, and webRTC.
- Designed and implemented RESTful APIs for dynamic and real-time voice, video, and text communication using SocketIO and Livekit.
- Collaborated on backend development, project architecture, and frontend authentication, ensuring a responsive web design.
