PROJECTS

Print Memories, 119 Days

We work on simple concept. Your ideas, your design, your memories, and our print. This would yeild a design of your desire with the finest quality. Because our promise built on the motto??What you design is what you get". We are Team Print Memories - the printing service, a well established and reputed online printing company in Australia. We emerged into this domain to prove how passionate we are about what we do, to provide excellent printing service to our customers.

File Sharing System, 253 days

File Sharing System is an intranet-based web application that provides support for group related operations and maintainance as well. The users can create groups among themselves and the files can be shared with these groups rather than sending the files individually to one another. Also, the access granting permissions can also be set for a user so that he/she should not be able to view/edit the file.
