Achievements/Tasks

- Task 1: Music Player Application - The goal of this project was to develop a music player application using Python. I started by researching and understanding the requirements for the player, such as playback controls, playlist management, and audio file format support. Then, I used Python libraries like Pygame or PyQt to build the graphical user interface (GUI) for the player.
- Task 2: Text Editor Application- For this project, I was tasked with developing a text editor application using Python. The objective was to create a versatile editor with features such as text editing, file management, and basic formatting options. I started by designing the GUI using a Python GUI library like Tkinter or PyQt.
