in <https://www.linkedin.com/in/shivani-musale-133479209>

SKILLS

- Frontend Technologies: HTML5, CSS3, JavaScript, angular
- Backend Technology: Node.js, C#, java
- Databases: SQL Server
- Tools: Postman, debugging
- Excellent analytical and technical skills
- Cloud computing, cloud digital leader

Education

- MVP's K.B.T. College of Engineering, Nashik
BE Instrumentation and Engineering
7.97 CGPA
- K.T.H.M College
HSC 60.62%
- Maratha High school Nashik
SSC 84%

Languages

- English
- Hindi
- Marathi

Training & Certification

- Full stack developer training from Infosys
- [Click here to view CERTIFICATIONS](#)

Courses

- Object Oriented Programming – Basics to Advance (Java OOP)
- Entity Framework Core
- Developing Services using ASP.NET Core Web API
- Developing Web pages using HTML5
- Designing and Styling web pages using CSS3.
- Full stack Google Cloud Digital Leader
- Angular for .NET Developers
- Database Management System
- C# Programming

Professional Experience 1.5 years

Sthapatya software pvt.ltd|June 2023-Till Date

- I work as a .NET developer, using C# for backend development and HTML, CSS, jQuery for the frontend. I also handle API integration and utilize SQL Server for database management.
- I've developed web applications, including projects like a **trade license** system and **Property tax management** for Panvel and PCMC. My role involves utilizing .NET technologies, C# for backend, Integrated Screens using HTML/CSS/jQuery for frontend, and integrating APIs while managing SQL Server databases.

Infosys limited |Aug 2022-June 2023

- I've developed and managed full-stack web apps using HTML5, CSS3, JavaScript, and Node.js frameworks. I excel in crafting user-friendly interfaces and seamless data flow via RESTful APIs. I'm adept at implementing CRUD operations in web apps and earned certifications from a comprehensive full-stack developer training program. I showcased my proficiency through a capstone project. I'm also skilled in API testing and debugging using tools like Postman.
- **Travel away app**
I developed "Travel Away," a full-stack travel app for seamless travel planning, booking, and management. As a frontend developer, I designed an appealing and intuitive UI using HTML, CSS, and JavaScript. Backend-wise, I employed Node.js for functions like authentication, search, trip planning, and API integrations. APIs from travel services were seamlessly integrated for flights, hotels, and more. Efficient data management was achieved through databases for user info, bookings, and travel data.
