## INTERNSHIP AND PROJECTS

Java Full Stack Development Intern

Hefshine Softwares | Pune

Dec 2023 - June 2024

- Acquired comprehensive skills in Java programming, covering both backend and frontend development aspects.
- Developed proficiency in utilizing popular frameworks and technologies within the Java full stack ecosystem.

Hospital Management

2022 - 2023

Major Project | B.E Final Year

- Its python based project which is used by hospitals for managing their patient history , billing , appointment etc.
- MySQL Database is used in backend for storing details in database.
- This application allows you to login using given credentials and then to fill required data in subsequent fields & tabs which will store all data into database in backend.
- In future I am planning to add a feature wherein patients will be able to book online appointment, paybills, etc.

Flash Card

2021 - 2022

Minor Project | B.E Third Year

- Its's a java project which is used by one language convert into many languages.
