Education

- BCA**
Sikkim Professional University
April 2022 - April 2024
- BCA**
JKP Polytechnic
August 2016 - June 2018
- Diploma**
JKP Polytechnic
June 2016 - June 2018

Technical Skills

- selenium
- cypress
- Java
- JavaScript

Soft Skills

- Time Management
- Teamwork
- Problem Solving
- Effective Communication

Sonu Singh

SDET/QA

Professional Summary

Dynamic and motivated professional transitioning into software testing, skilled in Python, Generative AI, and swift adaptation to tech stacks. Possesses strong problem-solving and collaborative skills, with a keen eye for detail to design and execute test scenarios, ensuring efficient identification and documentation of software issues.

Experience

- | | | |
|-------------------------------|-----------------|----------------------------|
| Provana India Pvt Ltd. | Process Analyst | March 2022 - November 2023 |
|-------------------------------|-----------------|----------------------------|
- Managed end-to-end accounts receivable processes for US-based healthcare providers, ensuring timely claim submissions and payments.
 - Analyzed and resolved claim denials and rejections by communicating with insurance companies, patients, and internal stakeholders.
 - Followed up on outstanding insurance claims and patient balances to minimize aging accounts and improve cash flow.

Projects

- | | | |
|------------------------------------|---------------------------|-----------------------------|
| AutomationTestStoreProject1 | Live Demo | Github Repo |
|------------------------------------|---------------------------|-----------------------------|

cypress

- Designed and implemented an end-to-end test automation suite for the TestStore website using Cypress, focusing on product search, add-to-cart, checkout, and user authentication.
- Developed reusable test scripts to enhance testing efficiency and scalability, integrating them with CI/CD pipelines for continuous testing and early bug detection.
- Conducted detailed analysis of test results to identify and report issues, ensuring a seamless user experience.

- | | | |
|------------------------------|---------------------------|-----------------------------|
| MeetSyncManualTesting | Live Demo | Github Repo |
|------------------------------|---------------------------|-----------------------------|

MS excel

MS word

- Conducted manual testing for the MEETSYNC website, designing test scenarios and executing test plans for modules such as Sign-up, Login, Dashboard, and User Management.
- Identified, reported, and tracked bugs and defects using a structured bug-reporting format, ensuring thorough documentation.
- Verified key functionalities such as User Authentication and Meeting Scheduling, validating critical user workflows.
