 - REST API for CRUD operations.
 - Deployment using Docker container on AWS.

Creliant Software PVT LTD, Baner (A Healthcare Company)

Junior software developer, June 2019 - Present

- **Livehealth**
 - Identified and resolved bugs in python backend.
 - Added features and enhancements Frontend + backend using reactjs, javascript and jquery.
 - Automated PDF generation using Jinja.
 - Automated Email and SMS sending using REST.
 - Innoviti ATM machine integration with company software for payment solutions.

PROJECTS

- **Virtual File System (C Lang)**

The Basic idea behind this project is to get deeper knowledge of working of the actual File System of Unix OS.

- **Shared Object (C++)**

If we are using static libraries then with each & every Process they get loaded into main memory, which increases overhead on main memory. Dynamic Linked Library gets loaded only once, all processes which require that libraries get access to that loaded file without loading it again in main memory.

- **School Management System(React)**

This project is to learn new technology(React) and understand, designing the DB, workflow for the application in 2 weeks of time span to learn Agile Development process. Technology used is ReactJs and DRF (MVC Architecture).

Technical Skills

- Languages
 - C
 - Python
- Technologies
 - Django (DRF)
 - Reactjs
 - Jinja
- Tools
 - Docker
 - Git
 - Postman
 - Vim
 - VS code
 - Bash
- Database
 - MySQL
