WORK EXPERIENCE

.Net Developer

SHAURYA TECHNOSOFT PVT LTD

04/2022 - Present

Pune, India

Roles/Responsibilities

- Working as a .NET developer, I collaborated closely with the project manager and a team of developers to define project scope, architecture, and technology stack
- Responsible for developing the Web API using ASP.NET Web API framework. This included creating API endpoints, request/response handling, and implementing RESTful principles
- Work closely with the frontend development team to facilitate seamless integration of the API with the dairy management web application
- Optimize SQL queries and database interactions, resulting in a 30% reduction in query execution time
- Generate comprehensive API documentation using tools like Swagger/OpenAPI, enabling other developers and stakeholders to understand and utilize the API effectively

Intern – ASP.NET MVC

Think Quotient Software Pvt. Ltd.

08/2021 - 03/2022

Pune, India

Achievements/Tasks

- Created interactive websites with software development department using Dot Net frameworks
- Prepared and submitted reports and other documentation to assist development team members
- I have implemented following proper standard structure and coding standards backend side .

EDUCATION

Master Of Computer Application

Sinhgad Institute Of Management, Pune

PROJECTS

HiTech Dairy

- HiTech Dairy was a comprehensive dairy management system designed to streamline and optimize various aspects of dairy operations, including milk production, inventory management, sales, and distribution.
- The Web API played a critical role in enabling seamless communication between different components of the system and facilitating data exchange with various client applications.
- The primary objective was to develop a user-friendly and scalable API solution that could handle various aspects of dairy farm management.

Human resources management system

- Human resources management is an online business management application, which basically used for managing employees, management work and increase revenue for the particular working environment.
- Identification of key HR processes to be included in the HRMS (e.g., employee records, payroll, benefits administration, recruitment, performance management, etc.).
- Consolidate employee information, records, and documents into a secure digital repository, eliminating the need for paper-based documentation.
