EXPERIENCE

Deployment Engineer

Feb 2023 – Nov 2023

Collaborating with the Army HQ Shimla to deploy the National Informatics Centre (NIC) e-Office system, streamlining administrative processes and enhancing digital communication within the organization. Providing user training and support, resulting in seamless adoption of e-Office.

Developed and implemented a robust Inventory Management System using PHP, HTML, CSS, and JavaScript. This system improved inventory tracking, reduced errors, and increased efficiency.

PROJECTS

Army HQ ARTRAC

Inventory Management System

The Inventory Management System is a sophisticated software solution designed to efficiently manage and track all IT inventory assets for HQ ARTRAC. It automates various inventory management tasks, such as asset categorization and lifecycle management. This automation reduces manual effort and minimizes the risk of data entry errors.

PG Diploma in Advanced Computing (C-DAC)

Assam Flood Relief Management System

This is a web-based application with the help of Government authorities and many different supporting agencies who work as a team to provide adequate measures for flood management. The primary purpose is to help people communicate with the rescue team through telephonic communication or by sending requests on the website. This application will help rescue the flood affected victims, relocate them to safe camps, and provide essential relief to the victims like food, medical and shelter.

Personal Portfolio Website

Successfully implemented React.js to develop a visually appealing and responsive website showcasing photography skills and knowledge of web development principles. <https://hippiefarer.vercel.app/>
