SUMMARY

Dedicated and growth-oriented full-stack developer with 5+ years of experience in building scalable, user-centric applications using Spring Boot, .NET Core, and Vue.js. Hands-on experience contributing to microservices architecture, improving backend systems, and mentoring junior team members to support overall team growth and code quality.

EXPERIENCE

Software Development Engineer 2,

Everwell Health Solutions Pvt Ltd, Bengaluru

Oct 2023 – Present

Software Development Engineer 1,

Everwell Health Solutions Pvt Ltd, Bengaluru

Mar 2021 – Oct 2023

- Led the development and maintenance of high-impact workflows within the **Direct Benefit Transfer (DBT)** system, a critical government initiative responsible for disbursing approximately **₹3,500 crores** in subsidies and incentives to patients and healthcare providers. Designed workflows and optimized operations to ensure high availability, accuracy, and on-time payments, contributing to large-scale healthcare impact.
- Designed and optimized APIs across microservices using **Spring Boot (Java)** and **.NET Core (C#)** for patient and staff workflows, along with scheduled jobs using **JobRunr** and **Hangfire**, and asynchronous messaging with **RabbitMQ** to improve system performance, scalability, and responsiveness.
- Engineered reliable data migration scripts for cross-database transfers and internal data restructuring tasks, migrating over **80 lakh records** while maintaining system stability and data integrity in production environments.
- Developed **Vue.js micro-frontend applications** to deliver statistical insights, streamline staff onboarding, manage patient test workflows, and present comprehensive patient and treatment data, improving usability and operational efficiency.
- Enhanced application observability and maintainability by integrating **Matomo** analytics for user navigation tracking and **Sentry** with Slack alerts for real-time error monitoring, resulting in a **70% reduction in issue detection time** and faster error resolution.
- Actively handled **critical on-call incidents**, resolving **high-impact issues** to maintain product reliability, minimize downtime, and ensure uninterrupted system performance.

- Implemented unit tests across .NET, Java, and Vue.js codebases to improve reliability and increase test coverage in critical modules.
- Mentored junior developers by guiding them through technical challenges, conducting code reviews, and promoting best practices to support their growth and strengthen team productivity.

Software Development Engineer,

Nov 2019 – Mar 2021

MountBlue Technologies, Bengaluru

- Initially deployed to Everwell Health Solutions as a contract developer and converted to a full-time role based on performance and contribution at the end of the contract term.
- Migrated of multiple .cshtml Razor views to Vue.js components, modernizing the frontend stack and enhancing UI responsiveness, code reusability, and maintainability.
- Debugged and fixed several critical API and scheduled job failures, reducing recurring production incidents and improving system stability.
- Implemented a mechanism for delivering timely messages and push notifications to users and patients, using scheduled jobs and integrating with multiple SMS vendors to ensure reliable and scalable communication.

SKILLS

Languages & Scripting: Java, C#, JavaScript, SQL

Frontend: Vue.js, Vuex, HTML, CSS

Backend & Frameworks: Spring Boot, .NET Core

Databases & Caching: PostgreSQL, MySQL, Redis

Other Tools & Technologies: RabbitMQ, Elasticsearch, Sentry, Matomo, JUnit, Mockito, Jest, Git, Docker, Microsoft Azure

EDUCATION

SJB Institute of Technology, Bengaluru - Bachelor of Engineering in Information Science and Engineering (Aug 2015 - Jun 2019)
