## Experience

---

### Octorite Technologies | Bengaluru, Kamataka

#### Software Engineer | 03/2023 - Present

As a Full Stack Dot Net Developer ,I am proficient in ASP.NET framework in C#, MS SQL, and PL-SQL and .NET Framework. With my expertise in these technologies, I contribute to the development and maintenance of robust and scalable software solutions. I specialize in leveraging C# to build efficient and reliable applications, ensuring seamless functionality and excellent user experiences.

### Infosys BPM Ltd | Bengaluru, Kamataka

#### Technology Infrastructure Group | 09/2022 - 03/2023

Technical Support Role.

## Technical Skills

---

Dot Net Framework

C#

SQL/MS-SQL/PL-SQL(Microsoft SQL Server Management Studio)

Desktop App(Winforms,Telerik Radforms)

Web App(ASP.NET Web Application,ASP.NET MVC,ASP.NET core Web API,BlazorApp,Telerik BlazorApp)

Javascript

HTML

CSS

Core Java

## Projects

---

### Windows Desktop Application

Developed an ASP.NET core Windows Application using C#, MS-SQL, and MQTT within Telerik UI for the apparel industry. Designed a comprehensive system that autonomously generates manufacturing plans, covering stages like Cutting, Stitching, Washing, and Finishing in garment production. Implemented RFID technology for real-time item tracking and scanning, providing detailed information for live updates to streamline production processes.

### Web Application

Developed an ASP.NET Web applications using C#, MS-SQL, ASP.NET WebApp(MVC model), ASP.NET core Web API ,JavaScript, HTML, CSS, and MQTT within Telerik Blazor for the apparel industry.Created a dynamic system that automates manufacturing plans encompassing Cutting, Stitching, Washing, and Finishing stages in garment production.Incorporated RFID connectivity to items for real-time tracking and scanning, delivering detailed information for live updates, optimizing efficiency in production planning for apparel manufacturing.

### Chat App

This project involved the integration of a ChatApp functionality into our company's software ,which is a comprehensive communication platform enhancing user engagement and collaboration within the software ecosystem. The goal was to enhance software by integrating a ChatApp functionality using ASP.NET RadChat with Telerik UI , C#, SQL, and MQTT.The ChatApp allowed users to engage in real-time conversations, exchange messages, and collaborate within the software ecosystem.ChatApp was a module that was added to the desktop application.

## Achievements

---

Client visit to **Brandix, Sri Lanka**, from Nov,2023-Jan,2024 as **Software Implementation Specialist**.

Successfully executed the implementation of the software at Brandix, optimizing their operational processes and enhancing overall efficiency. Collaborated with cross-functional teams at Brandix to understand specific business requirements and tailored software configurations accordingly. Solving on spot bugs and challenges along with any last moment requirements if any from the client side. Conducted on-site training sessions for Brandix staff, ensuring a smooth transition to the new software system. Maintained regular communication with the development team to relay client feedback and contributed to ongoing software improvements. Worked closely with clients to address any technical issues and provided timely resolutions, earning commendations for excellent customer service.

## Education

---

**Asansol Engineering College | Asansol**

**Bachelor of Technology | 07/2020**

7.99 D.G.P.A

**India International School | Asansol**

**Higher Secondary School Certificate | 05/2016**

81%

**St. Vincent High & Technical School | Asansol**

**Secondary School Certificate | 05/2014**

81%
