Education

Master of Computer Applications

Bhai Parmanand Institute of Business Studies
September 2022 - September 2024

Bachelor of Science(Mathematics)

MAHARAJ MAHESH THAKUR MITHILA COLLEGE, DARBHANGA
November 2018 - May 2022

Technical Skills

- Selenium
- CSS
- HTML
- CYPRESS
- PYTHON
- JAVA
- JavaScript

Soft Skills

- Teamwork
- Time Management

Certifications

Master of Computer Applications.

Bhai Parmanand Institute of Business Studies

PUNIT KUMAR

Professional Summary

Resourceful and detail-oriented SDET/QA with a strong focus on analyzing and identifying algorithmic and logic errors. Proficient in Python and automated testing methodologies. Demonstrates a commitment to leveraging Generative AI and swiftly adopting new tech stacks to enhance software quality.

Projects

Automated Testing of E-Commerce Application Login Page

[Github](#)
[Repo Link](#)

- JavaScript
- Cypress
- Node.js

- Developed an end-to-end automated testing suite using Cypress to validate the login functionality of an e-commerce application.
- Implemented data-driven testing techniques to cover a wide range of scenarios, enhancing test coverage and reliability.
- Focused on error handling, user authentication, and UI responsiveness across devices, simulating real-world usage.
- Documented all test cases with clear steps and expected outcomes to facilitate issue reproduction and resolution.
- Collaborated with cross-functional teams to ensure the test suite integration and deliver timely feedback.

MANUAL TESTING AND JAVA SCRIPT PROJECT

[Github Repo](#)
[Link](#)

- Excel
- MicroSoftWord
- X-mind
- Jira

- Conducted comprehensive manual testing for the login functionality, ensuring coverage of various user scenarios and edge cases.
- Created and executed detailed test scenarios and cases, documenting results for continuous improvement in the testing process.
- Validated user authentication, error messages, and form inputs, providing clear documentation for the development team.
- Used tools like Excel, Microsoft Word, and Jira for meticulous test management and issue tracking.
- Worked closely with the development team to discuss and resolve identified issues, enhancing software quality.
