Sanghamitra kamble

DOT NET DEVELOPER

✉ skamble0898@gmail.com 📞 8010537945 📍 Pune, Maharashtra, India

Summary

- ✓ Having 3+ years of overall experience in application development and customer-facing role.
- ✓ Having good knowledge about OOPs Concepts and implementation.
- ✓ Having good knowledge about server-side languages such as .Net Framework, .Net core, C#, ASP.NET, MVC, LINQ, Lambda Expression, Rest Web APIs, WCF Web APIs, MicroServices etc.
- ✓ Experience in consuming RESTful APIs with JavaScript, jQuery and HttpClient.
- ✓ Extensive experience with SQL Server writing stored procedures and queries and Accessing Database Table SPs and Triggers using ADO.NET and Entity Framework.
- ✓ Familiar with testing tools Fiddler and Postman.
- ✓ Having good knowledge about front end technologies like to HTML5, CSS3, Bootstrap, Angular 14,
- ✓ JavaScript, jQuery, Ajax, PLSQL etc.
- ✓ Design and Implementation of solutions using SOLID principles and Design patterns.

PROFESSIONAL EXPERIENCE:

.Net Developer

Company Name	Nimbja Security Solution Pvt. Ltd
Designation	Software Developer
Duration	June 2021 – Till Date

Technical Proficiency

Server-Side Technologies and Languages	.Net Framework, .Net core, C#, ASP.Net, MVC 5, REST Web APIs, WCF Web APIs, LINQ, Lambda Expressions, ADO.NET, Entity Framework, MicroServices, SignalR etc
Database	MS SQL Server, My SQL, Postgre SQL, PLSQL
Operating Systems	Windows 7 and Later
Front end technologies	HTML5, CSS3, Bootstrap, JavaScript, Ajax, jQuery, Angular etc

PROJECTS:

Project Title: Event Management and Ticketing Platform

Front End Technologies	: HTML5, CSS3, Bootstrap, JavaScript, jQuery, Ajax, Angular.
Back End technologies	: C#, ASP.NET, MVC 5, LINQ, Lambda Expression, Entity Framework, ADO.NET, WCF Web APIs, Rest Web APIs, MicroServices etc.
Database	: SQL server 2016 & PLSQL
Role	: Full stack developer (UI + server side + database side)

Overview:

The Event Management and Ticketing Platform is a web-based application designed to simplify event planning, promotion, ticket sales, and attendee management. It offers event organizers tools to create engaging experiences for both attendees and hosts.

Key Features:

- Event Creation: Organizers can create and customize event pages with details, images, and schedules.
- Ticketing System: Attendees can purchase tickets online with secure payment processing.
- Attendee Management: Tools for tracking attendee information, registrations, and check-ins.
- Interactive Sessions: Virtual and in-person events with interactive sessions, Q&A, and polls.
- Exhibitor Booths: Virtual booths for sponsors and exhibitors to showcase products and services.
- Analytics and Insights: Event performance analytics, attendance data, and engagement metrics.

Technologies Used:

HTML5, CSS3, Bootstrap, JavaScript, Angular, jQuery, Ajax, C#, ASP.NET, MVC5, EntityFramework.

Rolls And Responcibility:

- ✓ Participate in requirement analysis.
- ✓ Collaborate with internal teams to produce software design and architecture.
- ✓ Test and deploy application and systems.
- ✓ Rivise, update, refactor and debug code.
- ✓ Improve existing software.
- ✓ Worked well independently and within a team setting
- ✓ Effectively translated client requirements into complete application design, from database project architecture, and systems requirements.
- ✓ Planned, developed, tested, deployed, and maintained windows desktop applications.
- ✓ Develop and maintain the back-end server logic using C# and ASP.NET MVC to handle user request, data processing, and interactions with the database.
- ✓ Part of each and every meeting actively held in that project.
- ✓ Involved in scrum meetings, groom user stories, planning and estimation.
- ✓ Take a peer review on code and functionality development.
- ✓ Participate in design and technical discussion.

Project Title: Online Marketplace Plateform(E-COMMERCE)

Front End Technologies	: HTML5, CSS3, Bootstrap, JavaScript, jQuery, Ajax, Angular.
Back End technologies	: C#, ASP.NET, MVC 5, LINQ, Lambda Expression, Entity Framework, ADO.NET, WCF Web APIs, Rest Web APIs, MicroServices etc.
Database	: SQL server 2016 & PLSQL
Role	: Full stack developer (UI + server side + database side)

Overview:-

The Online Marketplace Platform is a web-based application that connects buyers and sellers, offering a versatile platform for e-commerce transactions. It provides a diverse range of products, secure transactions, and a user-friendly experience.

Key Features:

- ✓ Vendor Listings: Vendors can list their products with descriptions, images, and pricing.
- ✓ Shopping cart: Users can add items from multiple vendors to a single cart for checkout.
- ✓ Secure Payments: Integration of secure payment gateway for safe transactions.
- ✓ Reviews and Ratings: User-generated reviews and ratings for informed purchasing decisions.
- ✓ Vendor Dashboards: Vendors have access to sales data, order management, and inventory tracking.
- ✓ Search and Filters: Advanced search and filtering options for efficient product discovery.

EDUCATION:

BE in computer science engineering 2019.

PERSONAL DETAILS:

Date of Birth	:	08/08/1992
Nationality	:	Indian
Marital status	:	Single
Gender	:	Female
Languages Known	:	English, Hindi and Marathi

Declaration :

I hereby declare that the above-mentioned information is true and correct to the best of my knowledge and belief.

Place: Pune

Date: / /2024
