📍 Pune, Maharashtra

## PROFILE SUMMARY

---

I have been born and raised up in Pune. I completed my formal education from Schooling till Post-Graduation from Pune. During the school I was good in my studies and developed the hobby of reading books and learning a foreign language. I scored overall good marks in my academics and developed my interest in Science field. I opted for Science stream after 10th standard and further graduated in Geology subject. During the college days I became passionate about reading books and maintaining fitness. Further the Geology subject was not so appealing for me, so I decided to shift my stream to Social-Sciences. I did my post-graduation in Social -Work (MSW). During the post-graduation field work I explored the various necessities of humans and my desire to help them so they can help themselves. This further widened my interest to work in the social work field and develop myself professionally. I further plan to work in the field where I can utilize my training and skills, while making a significant contribution to the workplace. Future educational plan include completing Phd in Social Work.
