Feb 2021 - Sep 2021

- Worked closely with the team to troubleshoot and debug issues, ensuring smooth software operation.
- Utilized Java, jquery ,html ,CSS .SQL server in backend.

### PROJECTS

#### Aquire Application(coupa)

A B2B platform that connects suppliers and customers. The project involves utilizing agents, which are small software components developed in Java with the assistance of JQuery and JavaScript. These agents are responsible for displaying search pages and detail pages in the Aquire format.

#### Mis Reports

UThe main objective of this project is to create a user-friendly platform that provides status updates for user-created applications

#### Autocorrect user file data

Its primary purpose is to facilitate easy correction of errors and updates within user data, enhancing data accuracy and reliability.
