# Praveen Kumar Singh

## Professional Summary

Dynamic Full-Stack Web Developer skilled in the MERN stack, adept at using Generative AI and rapidly learning new technologies. Proficient in developing scalable web applications, designing efficient server-side APIs, and optimizing database models. Strong problem-solving abilities and excellent team collaboration skills.

## Projects

Build New Programing Language [Live Demo Link](#) [Github Repo Link](#)

- JavaScript
- Git
- HTML5
- CSS3

### Responsive Web Design

- Collaborated with a team of 5 to design and develop VisionScript, a new programming language focused on simplifying complex operations.
- Contributed to the development of an intuitive syntax that enhances developer productivity by reducing boilerplate code.
- Assisted in implementing flexible function definitions to streamline the coding process and support dynamic programming styles.
- Utilized JavaScript, HTML5, and CSS3 to create a responsive web interface for showcasing VisionScript.
- Maintained version control using Git to ensure collaborative development and code quality.

Weekend Planner [Live Demo Link](#) [Github Repo Link](#)

- HTML5
- CSS3
- JavaScript
- React
- Redux

### Responsive Web Design

- Collaborated with team members to integrate user authentication features using React and Redux, enhancing secure login options.
- Assisted in the development of group scheduling and availability features, enabling seamless coordination among users.
- Contributed to the implementation of activity suggestion functionality, offering curated venue and event recommendations based on user preferences.
- Participated in designing and developing responsive frontend components using HTML5 and CSS3 to ensure optimal user experience across devices.
- Utilized Git for version control and collaborative development, ensuring efficient workflow and code management.
