

MAYANK PARMAR || SOFTWARE ENGINEER

mayankparmar249@gmail.com | Ahmedabad | +91-76219-42957 | LinkedIn

PROFESSIONAL SUMMARY

Results-driven Backend Developer with 3.5 years of experience specializing in backend technologies, primarily working with **Laravel** and other PHP frameworks like **CodeIgniter 3** and **Yii2**. Proficient in developing robust, scalable web applications and **RESTful APIs**. In addition to backend expertise, possesses working knowledge of frontend technologies including **React**, **Next.js**, and **Vue.js**, enabling effective collaboration in full-stack projects. Experienced in using DevOps tools such as **Docker**, **Git**, and **AWS** for deployment, **version control**, and cloud infrastructure management. Committed to delivering clean, efficient, and maintainable code in fast-paced, agile environments.

TECHNICAL SKILLS

- **Programming Languages:** PHP, JavaScript, SQL
- **Backend Frameworks:** Laravel, CodeIgniter 3, Yii2, Node JS
- **Frontend Technologies:** React.js, Next.js, Vue.js, HTML5, CSS3
- **Databases:** MySQL, PostgreSQL, MongoDB, SQL Server
- **DevOps & Cloud Tools:** Docker, AWS, Git, GitHub, SVN
- **API & Web Services:** RESTful APIs, Postman, curls
- **Version Control & CI/CD:** Git, GitHub, Git Bash, Azure DevOps
- **Project Management & Collaboration Tools:** Jira, Basecamp, Slack, ERP
- **Other Tools & Skills:** Composer, NPM, Visual Studio Code, XAMPP, WAMP, Linux Server Management, Agile Development, MVC Architecture

PROFESSIONAL EXPERIENCE

Software Engineer / Project Manager, AR Technolabs

10/2024- Present | Ahmedabad, India

Gurukul Project (Global Spiritual Management Platform)

- Managed a worldwide Gurukul management system including a website, mobile app, and CRM.
- Implemented modules for donations, guest house bookings, event scheduling, seva registration, blood group directory, and magazine management.
- Integrated Axis Razorpay payment gateway for secure online donations.
- Communicated directly with Swamiji and clients for gathering requirements and project updates.
- Led a development team, assigning tasks, reviewing work, and providing technical guidance.

Num-Station (China/Hong-Kong)

- Developed a Laravel-based accounting and business management platform.
- Integrated Airwallex payment gateway for seamless China wallet transactions.
- Added Google Cloud Storage and Google Drive integration for secure file management.
- Developed a live chat support feature to enhance customer service.
- Implemented multi-language support for global user accessibility.
- Collaborated with cross-functional teams to deliver scalable, secure solutions.

Netbook-Flix (E-learning Platform)

- Contributed to a Laravel + Next.js-based digital content platform.
- Developed a custom E-Reader for digital publication viewing.
- Resolved technical issues and mentored junior developers.

Backend Developer, Moon Technolabs

07/2023- 08/2024 | Ahmedabad, India

Moon-Invoice (Online Invoicing & Billing Platform)

- Contributed to the development and maintenance of MoonInvoice — a feature-rich online invoicing and billing platform.
- Worked extensively on the Pricing Page, integrating multiple payment gateways including Stripe and Paddle for flexible subscription management.
- Developed and maintained RESTful APIs used by the MoonInvoice web app, built with AngularJS on the frontend.
- Integrated popular automation tools like Zapier, Pabbly, and Integromat to connect MoonInvoice with external systems and streamline workflows.
- Provided technical support and guidance to junior developers, especially in configuring complex external integrations and automation setups.
- Collaborated with frontend developers, QA teams, and project managers to deliver a seamless, user-friendly experience.

Moon Admin Panel (Web-based Administration & Analytics Tool)

- Designed and developed a custom admin panel to visualize real-time analytics, generate detailed reports, and manage user data across multiple products.
- Corrected software design issues during both development and post-deployment phases, ensuring stable and reliable system performance.
- Managed data and workflows for applications like Moon Invoice, Moon Dialer, and Basecamp, ensuring seamless backend operations.
- Delivered clean, optimized, and scalable code within tight project deadlines, improving system efficiency and maintainability.
- Analyzed user and client requirements to design intuitive, efficient, and user-friendly software interfaces for administrative users.
- Integrated backend APIs to fetch and manage data securely, supporting dynamic dashboards and analytics views.
- Collaborated closely with frontend developers and testers to ensure error-free UI integration and smooth backend operations.
- Provided technical guidance and support to junior developers, reviewing code and helping troubleshoot integration issues.

Backend Developer, vRajan Infotech Pvt Ltd

01/2022- 07/2023 | Ahmedabad, India

E-Commerce Project (Web & Mobile API Backend)

- Developed RESTful APIs for both web and mobile platforms to support seamless e-commerce operations.
- Implemented cron jobs using latitude-longitude-based features to automate location-based processes and scheduled tasks.
- Designed and built a complete Admin Panel from scratch using the Laravel Backpack framework, enabling easy management of products, orders, users, and settings.
- Integrated a product referral and points-based reward system, incentivizing user engagement and purchases.
- Developed a multi-admin system with dynamic role-based access control (RBAC) for managing users, permissions, and administrative privileges.
- Developed a multi-admin system with dynamic role-based access control (RBAC) for managing users, permissions, and administrative privileges.
- Implemented secure authentication and authorization systems, ensuring data privacy and role-based feature access.
- Collaborated with frontend developers and mobile teams to ensure smooth API integration and efficient performance.
- Optimized database queries and backend processes for improved performance and scalability.
