Education

Software Engineering In Test

Masai School
August 2024 - December 2024

Computer Science & Engineering, Polytechnic

Board of Technical Education
Uttar Pradesh
October 2021 - July 2024

Technical Skills

- Jira
- Agile
- Selenium
- CSS
- Postman
- Cypress
- HTML5
- JavaScript

Soft Skills

- Public Relations
- Project Management
- Time Management
- Teamwork

Certifications

Construct Week Project

Masai School

I have received this certificate from Masai School for my participation in the Construct Week project in which I performed manual testing.

Shivendra Singh

Professional Summary

Diligent and innovative Software Tester with proficiency in Java Script and a solid understanding of testing methodologies. Demonstrates exceptional problem-solving skills and collaborative ability to identify and resolve errors. Quick to learn new technologies and adept in utilizing Generative AI, ensuring robust software quality.

Projects

OpenCart (Automation Testing)

[Github Repo Link](#)

- JavaScript
- Cypress
- Agile

- Designed and executed comprehensive test scenarios for core functionalities of the OpenCart e-commerce platform, focusing on browse, search, cart management, checkout, and payment processes.
- Collaborated with developers to understand and validate software requirements for third-party integrations including plugins, shipping modules, and payment gateways.
- Developed test plans and test cases for algorithm-intensive components, ensuring comprehensive validation and performance benchmarking.
- Used Cypress to automate tests, enhancing the efficiency and accuracy of the testing process, and verified administrative features related to product, order, and user management.

GlobalSQA (Manual Testing) [Github Repo Link](#)

- JavaScript

- Developed detailed test cases and plans to ensure comprehensive coverage of website functionality, UI, performance, security, accessibility, and browser compatibility.
- Collaborated with developers to ensure timely resolution of identified bugs and improve overall software quality.
- Created essential documentation such as Test Case, Mind Map, RTM, Test Plan, Bug Report, and Summary Report to support the testing process.

Kazam EV Charging [Github Repo Link](#)

- Agile
- MS Excel
- Manual Testing

- Microsoft Word

- Collaborated with developers to understand the app's features and software requirements, enhancing test effectiveness.
- Documented and reported identified issues with clear reproduction steps, facilitating timely bug resolution.
- Participated in the development of test plans, scenarios and test cases, ensuring thorough coverage of app functionalities.
- Utilized manual testing techniques to validate the booking, navigation, and payment components of the app.
