Travelling

### PROFILE

Highly dedicated and skilled Software Engineer with a robust background in full-stack development and product development. Adept at combining technical expertise with a keen understanding of business needs to deliver innovative software solutions. Possesses strong logical thinking and problem-solving skills, consistently driving projects to successful completion. Proven ability to navigate the entire software development lifecycle, from conceptualization to implementation, with a focus on efficiency and excellence. Committed to staying at the forefront of technology trends and continuously enhancing skills to contribute effectively to dynamic and challenging development environments

### WORK EXPERIENCE

#### SOFTWARE DEVELOPER

SEAGULL VICTSOFT PVT LTD August 2022 - Present

As a Software Developer specializing in product development, I bring extensive expertise in utilizing cutting-edge technologies to drive innovative solutions. Proficient in the complete software development lifecycle, I have a strong knowledge of ASP.NET Core, Entity Framework, MySQL, and Angular as a full-stack developer.

Demonstrated proficiency in ASP.NET Core, Entity Framework, MySQL, and Angular for end-to-end full stack development; adept in Agile methodologies, Scrum practices, and collaborative problem-solving, actively engaging stakeholders for comprehensive requirement gathering and proposing solutions with a focus on business objectives

My commitment extends beyond code; I actively engage with stakeholders, fostering a collaborative environment. Through meaningful discussions and a comprehensive approach to requirement gathering, I've consistently proposed and implemented solutions aligned with business objectives. This holistic perspective ensures that the software solutions developed not only meet technical standards but also contribute directly to the success of the broader organizational goals.

### PROJECTS

#### SQL QUERY GENERATOR

Developed a C# and .net based console application facilitating dynamic SQL query generation based on Excel sheet configurations, streamlining database interactions and enhancing query adaptability.

#### CODE GENERATION

Implemented a time-saving project in C# using T4 templates, allowing for the creation of reusable templates. This approach significantly reduces development time and effort by streamlining the template generation process

#### TO DO LIST

Developed a To-Do List application in Golang, providing users with an intuitive and efficient task management tool. This project seamlessly combines the power of Golang to deliver a reliable and user-friendly solution for organizing and tracking tasks.
