## EXPERIENCE

---

### EDI-BAU Lead - Tata Consultancy Services

2013-Present

- Spearheaded the implementation of Electronic Data Interchange (EDI) protocols between our organization and its suppliers, ensuring seamless data exchange.
- Managed the provisioning and transmission of XML files to suppliers, meticulously overseeing file triggering mechanisms.
- Applied rigorous validation protocols to verify Advanced Shipping Notices (ASNs) against predefined industry standards and guidelines.
- Led testing efforts, including the management of EDI map configurations to accommodate evolving requirements and specifications.
- Specialized in handling complex scenarios such as Direct Shipments, requiring precise coordination and execution.
- Conducted thorough internal audits and Problem Management Record (PMR) activities to maintain data integrity and system reliability.
- Provided technical oversight and guidance to an offshore team, ensuring alignment with project objectives and standards.
- Proficient in EDI standards like ANSI X12 and EDIFACT.
- Experienced in establishing connectivity to ERP systems, external systems, and trading partners using protocols such as AS2, FTP, SFTP, and VAN.
- Skilled in handling escalations and ensuring timely follow-ups with respective teams until incident closure.
- Capable of attending to client business requirements effectively.
- Good knowledge of various data formats including positional, flat, CSV, XML, and IDOC.

### Senior Tester Lead

- Conducted comprehensive testing across various components of data solutions, ensuring robust functionality and performance.
- Focused on verifying part validation processes and system functionalities, ensuring adherence to quality standards.
- Played a pivotal role in testing and validating connectivity between disparate systems, optimizing data flow and interoperability.
- Ability to create test scenarios and test data for validating EDI maps.
- Responsible for task delegation and overseeing completion within the team.
- Extensive experience working with suppliers, retail partners, and third-party trading partners.
  - Involvement in inventory management, order processing, testing, and validation across multiple models.
