Purval Prashant Kamble

Professional Summary

Proactive Data Analyst with expertise in SQL, Python, and Power BI. Skilled in data visualization, reporting, and leveraging Generative AI for actionable insights. Adept at collaborating across teams, learning new tech rapidly, and driving strategic decisions through analytical precision and effective communication.

Projects

Hospital Performance Metrics Dashboard [Github Repo](#) [Link](#)

Power BI Excel

- Designed and implemented Power BI solutions for visualizing hospital performance metrics.
- Transformed raw data into actionable insights, helping stakeholders assess performance strengths and weaknesses.
- Developed interactive dashboards that foster data-driven decision-making.
- Utilized Power BI and Excel for effective data transformation and visualization.

Netflix Content Strategy Analysis [Github Repo](#) [Link](#)

Python Jupyter Notebook Data Visualization

Data Cleaning

- Analyzed Netflix dataset for content strategy insights, focusing on release dates, content types, and viewing hours.
- Cleaned and transformed data by removing duplicates, handling missing values, and ensuring consistency.
- Created visualizations using Matplotlib and Seaborn to identify trends and patterns in content performance.
- Concluded that Netflix's content strategy maximizes viewership through targeted release timing and content variety.
- Presented insights indicating higher viewership for shows compared to movies, with significant spikes in December and June.
