and facilitated self-assessment for team members. Developed three key modules: User Work Matrix, Sales Engineer Target, and User Performance. Leveraged canvas graphs and Excel reporting to visualize performance metrics.

Ashcroft / AARICO

822 Days

We have developed a multi-language application for internal management of Ashcroft Company based in Saudi Arabia. In this application management of new product and repairing of old product is done. The parts required for production same are made in some companies and some are order form outside the country. Also, they have sub companies in multiple countries, the product are also send and out of country product delivery is also done. Product of Ashcroft company exp:- pressure instrument 1) pressure gauges, 2) Presser switches 3) Pressure Sensors, Temperature instrument 1) Thermometers, 2) Multipoint Sensors 3) Temperature switches. I worked on this project from start to finish my role on this project full- stake developer. As project was big, it was very interesting and responsible work. I made multiple module Master level I made 1) Customer Master 2) Exchange Rate 3) Supplier Master 4) Transporter 5) Product Technician Master , 6) Extended Model Master and Transaction level I made 1) Contract

AARICO EMS Express

170 Days

Description: I contributed to the development of the AARICO EMS Express project, which focused on implementing QR code technology for tracking product lifecycle from production to delivery. This involved creating QR codes for presser valves, enabling step-by-step monitoring of assembly and testing processes according to customer specifications. I primarily worked on two key models: hydro test and packing.
