EDUCATION

Bachelor Of Engineering, Savitribai Phule Pune University
CGPA-8.59.

2018-2022

SKILLS

Technical Skills	Python,C++,Java,C#,javascript,Flask,Django,.NET,ASP.NET,NodeJS,ExpressJS,MySQL. AWS,Azure,Docker,Redis,RESTful API,System Design.
Soft Skills	Problem Solving, Teamwork, Communication

EXPERIENCE

Systems Engineer
Infosys

Aug 2022 - Present
Pune, India

- Developed a secure website authentication and authorization mechanism using Azure AD with **ASP.NET,Entity Framework,SQL Server**.
- Increased user interaction efficiency by 22% through the deployment of an algorithm leveraging various data structures.
- Designed and implemented a messaging system using web sockets for customer-admin interaction.
- Implemented basic **WEB API** features for internal employee tasks, enhancing system effectiveness.
- Designed a profile system for internal employees to track roles, salary history, leaves, bonuses, and company information.
- Designed a desktop application using **.NET framework and MySQL database** to track patient visits and medical history.
- Developed a patient registration system to record current and previous diseases.
- Implemented a feature to manage medicine stock and update **MySQL** database accordingly.
- Created a bill generation system for accurate billing calculation.

PROJECTS

1.MyInterio. Built a website using **Django,MySQL** for an interior designer to take business to social so customers can reach out to more customers. Deployed a **web socket** to connect with the customers and designer. Implemented a gallery section to showcase the work of the interior designer.

2.MyEStore Developed a website using **ASP.NET and ADO.NET** for accepting orders online for products which helped businesses **grow by 36%** compared to offline businesses. Implemented a system to get orders from customers which helps customers to get products online from that store.Deployed an **Email System using SMPT client** to get notification of orders both store admin and customers. Used **Redis** to pre-compute the queries to get fast results. Deployed using Azure web application.

ACHIEVEMENTS AND ACCOMPLISHMENT

- Azure Fundamentals: [Link](#)
- Certified Microsoft azure developer associate: [Link](#)
- Solved 590+ problems on leetcode: [Link](#)
- Created a PYPI library for python(open source contribution): [Link](#)
