2.5+ years of experience in building cutting-edge web solutions for finance and legal compliance domain industry with .Net core, C#, LINQ, Entity framework, Angular 16, Typescript. Worked with micro-service and micro-frontend architecture based multi tenant solution in .Net core and Angular framework

WORK EXPERIENCE

Software Engineer Globant

12/2021 - Present

Pune, India

Working as full stack software developer

- Working on a **micro-service** and **micro-frontend** architecture based web solution which empowers users to build, configure and offer an application setup wizard which allows customization of Apps for clients. It thus provides the opportunity to access multiple compliance analytics applications a-la-cart with data and analytics that are shared across the apps.
- I provide end to end solutions to user stories by developing APIs and consuming those on frontend to integrate data on UI.
- Also doing thorough testing of these user stories on QA environment and closely working with the BA to mark them as ready.
- Actively using **github copilot** for optimizing code and writing unit test to reduce time for development of US.
- Actively using **git tools** for version control and handling deployment with integrated **CI/CD pipelines**.
- Worked on features like internationalizing the product with 100+ languages supported, created and worked on dedicated translator micro-service which uses mongoDb as a database to store translations of all static and dynamic labels from the application.
- Integrated third party libraries like AG-Grid, PrimeNg, Angular material, ngx-translate.
- This project involves technologies like- .Net core 6, Angular 16, SQL Server 2017, Entity Framework core, ABP framework, Single-SPA, Jest, X-Unit, Hangfire.
