IT Project Manager with 6+ years of experience in E2E project management using PMP, PRINCE2 and Agile. Proven success in delivering mobile apps, web apps, and backend services through effective planning, stakeholder management, and on-time delivery. Certified Scrum Master with expertise in driving Agile practices, team collaboration, and project execution.

Experience

NOVEMBER 2022 – PRESENT

IT PROJECT MANAGER | FINFACTOR TECHNOLOGIES PVT LTD | PUNE, INDIA

- Led multiple API services projects, managing end-to-end project execution using Scrum and ensuring successful rollouts through effective release management.
- Set up and managed Zoho Projects, organized sprints, and facilitated Scrum ceremonies, including Sprint Planning, Daily Scrum, Sprint Reviews, and Retrospectives.
- Implemented Kanban frameworks to optimize workflows, increase productivity, and ensure timely project delivery.
- Set clear expectations with clients, ensuring alignment on project goals, timelines, and deliverables.
- Delivered critical change requests for multiple PSUs & Private banks and NBFCs, focusing on InfoSec, Compliance, Security, and VAPT deliverables, consistently meeting deadlines and maintaining high-quality standards.
- Performed risk analysis and management in every change request or development, ensuring minimal adverse impact while creating opportunities for improvements and growth.
- Played an integral role in the first Data Center - Disaster Recovery (DC - DR) drill, contributing to organizational preparedness for critical events.
- Actively participated in compliance control audits for project management, ensuring adherence to industry regulations.
- Planned and managed project enhancements alongside change requests, setting precise timelines and consistently exceeding expectations.
- Guided the support team through multiple phases, ensuring continuous delivery and high-quality outcomes.

JANUARY 2022 – OCTOBER 2022

IT PROJECT MANAGER | CAPITA | PUNE, INDIA

- Led end-to-end project management for in-house IT applications, overseeing all phases from initiation to closure.
- Implemented Agile methodologies (Scrum & Lean), including setting up and managing Azure DevOps and conducting Scrum ceremonies.
- Delivered a mobile application using React Native for employee attendance management, enhancing accessibility and streamlining internal processes.
- Delivered an in-house .NET web application for employee exit management, designed to identify reasons for employee exits and collect inputs to better understand the factors influencing their decision to leave the organization.
- Conducted risk analysis and prepared key project documentation such as Burndown Charts, Project Timelines, RACI Matrices, RAID Logs, and Financial Cost Books to ensure alignment and transparency.
- Managed resource allocation and tracked project progress using Kanban frameworks in Jira, optimizing workflows and enhancing cross-functional team collaboration.

- Oversaw pre-sales governance, managed purchase orders, and handled contracting to ensure smooth project kick-offs and consistent stakeholder engagement.
- Successfully managed project budgets, timelines, and deliverables while mitigating risks and ensuring compliance with industry standards.

JULY 2021 – JANUARY 2022

Associate IT Project Manager | MIRAKI TECHNOLOGIES | HYDERABAD, INDIA

- Managed the full project lifecycle, including planning, monitoring, and controlling, ensuring on-time delivery within scope and budget.
- Established and maintained an Agile environment using Jira, leading Scrum ceremonies such as Sprint Planning, Daily Scrum, Sprint Reviews, and Retrospectives.
- Set clear client expectations for deliverables, ensuring alignment throughout the project lifecycle.
- Conducted risk management processes to identify, assess, and mitigate project risks.
- Prepared project timelines, cost estimates, and essential project documentation.
- Managed end-to-end projects, including a React Native mobile application for the National Health Mission (NHM), an Angular-based web application similar to Twitter, and an e-commerce website built on Magento, ensuring scalability, robust functionality, and user-centric design.
- Led digital marketing initiatives by defining Segmentation, Targeting, and Positioning (STP) strategies to enhance marketing effectiveness.

MARCH 2018 – AUGUST 2018

INTERN – PROJECT COORDINATOR | IVL GLOBAL | PUNE, INDIA

- Liaised between stakeholders and the Scrum team to gather and clarify project requirements, ensuring alignment with business goals.
- Practiced Agile methodologies for a .NET/AngularJS/TypeScript-based web application project, ensuring effective configuration, unit testing, and sanity testing for a well-known North American oil and gas industry player, resulting in successful delivery.

JULY 2016 – FEBRUARY 2018

SOFTWARE ENGINEER | ILIMITECH PVT LTD | PUNE, INDIA

- Skilled in HTML, CSS, JavaScript, Bootstrap, and SQL Server for web development.
- Experienced in preparing Business Requirement Documents (BRD), Functional Requirement Documents (FRD), and Software Requirement Specifications (SRS) to accurately define project requirements for the IT Ticketing Tool web application and Incident Raising App.
- Applied Agile methodologies and hybrid project management approaches to ensure efficient resource planning, timely delivery of milestones, and successful project execution.
- Proficient in stakeholder management and identifying technology solutions to drive project success.
