## Project:

### Project 1: Healthcare Appointment Scheduling System

**Overview:** The Healthcare Appointment Scheduling System is a web-based application that simplifies the process of booking and managing appointments with medical practitioners. It offers patients a user-friendly interface, real-time availability, and automated reminders.

**Key Features:-**

Appointment Booking: Patients can schedule appointments with doctors based on availability.

- Real-time Availability: Real-time updates of doctor schedules and available time slots.
- Patient Profiles: Patients can create profiles, manage medical history, and track appointments.
- Automated Reminders: Automated reminders for upcoming appointments via email or SMS.
- Doctor Dashboards: Doctors can view their schedules, manage patient data, and confirm appointments.
- Administrative Tools: Clinic administrators can manage doctor schedules, patient records, and billing.

**Technologies Used:** HTML5, CSS3, Bootstrap, JavaScript, jQuery, Ajax. C#, ASP.NET, MVC5, EntityFramework.

---

**Project 2: Nail ERP**

**Overview:** The Beauty Parlour/Salon Appointment System is a web-based application designed to simplify appointment scheduling and management for beauty parlours and salons. It offers a convenient platform for clients to book appointments, and for salon staff to manage their schedules.

**Key Features:-** Appointment Booking: Clients can browse available services and book appointments based on availability.- Stylist Selection: Clients can choose their preferred stylist or beauty professional.- Real-time Availability: Real-time updates on stylist schedules and available time slots.- Automated Reminders: Automated reminders for upcoming appointments via email or SMS.- Stylist Dashboards: Stylists and salon staff can view their schedules, manage appointments, and track customer preferences.- Administrative Tools: Salon administrators can oversee stylist schedules, manage customer data, and streamline operations.

**Technologies Used:** HTML5, CSS3, Bootstrap, JavaScript, jQuery, Ajax. C#, ASP.NET, MVC5, EntityFramework.
