

## Skills

---

- Core Java
- MySQL
- JUnit
- Hibernate
- Postman
- API Testing
- Spring Boot
- Restful APIs
- MySQL
- Microservices

## Professional Summary

---

Highly-qualified Java Developer offering 4+ years of progressive experience. Expert at designing, developing and maintaining wide range of new and existing client products. Clear communicator and effective project manager. Forward-thinking development professional bringing expertise in Java, MySQL, Angular, API Testing, Hibernate and other programming languages.

## Work History

---

**Java Developer** 03/2024 to 12/2024  
**Cybage Software solutions** – Pune

**Software Developer** 10/2020 to 02/2024  
**E-Horizons Software Solutions** – Pune

### Chase Travel portals | Cybage Software

---

Description: Developed a web-based application enabling authenticated users to perform online bookings. The application featured modules such as User Identity Model, Online Booking Tool, View Itineraries, and Client Information to enhance the user experience and streamline travel-related processes.

- Designed and implemented core functionalities for various modules.
- Conducted **API testing** and ensured seamless integration of **microservices**.
- Troubleshoot and resolved performance issues to enhance system efficiency.

### IronFX | E-Horizons

---

IronFX Insurance System

*Description:* Developed a web-based application to manage various types of insurance, including life, vehicle, health, mobile, and travel insurance. The system supported multiple

payment modes (monthly, quarterly, semi-annual, and annual) with options for online or cheque payments.

- Designed and developed backend services for managing customer insurance details using **Spring Boot**.
- Implemented efficient payment processing and policy management modules.
- Collaborated with stakeholders to gather requirements and deliver solutions.
- Conducted rigorous testing to ensure reliability and accuracy of the system.

## Safar Car Booking | E-Horizons

---

### Safar Car Booking System

*Description:* Designed an online platform for cab booking, allowing users to book cars as per their requirements and receive real-time notifications with driver details. The system ensured seamless communication between users and drivers.

- Developed and maintained core functionalities for booking and notification modules.
- Integrated third-party APIs for real-time driver assignment and tracking.
- Conducted code reviews to maintain high standards of quality and performance.
- Provided technical support and implemented feedback to improve user satisfaction.
