Project 1: Event Management and Ticketing Platform

Overview: The Event Management and Ticketing Platform is a web-based application designed to simplify event planning, promotion, ticket sales, and attendee management. It offers event organizers tools to create engaging experiences for both attendees and hosts.

Key Features:

- Event Creation: Organizers can create and customize event pages with details, images, and schedules.
- Ticketing System: Attendees can purchase tickets online with secure payment processing.
- Attendee Management: Tools for tracking attendee information, registrations, and check-ins.
- Interactive Sessions: Virtual and in-person events with interactive sessions, Q&A, and polls.
- Exhibitor Booths: Virtual booths for sponsors and exhibitors to showcase products and services.
- Analytics and Insights: Event performance analytics, attendance data, and engagement metrics.

Technologies Used: HTML5, CSS3, Bootstrap, JavaScript, Angular, jQuery, Ajax, Angular, C#, ASP.NET, MVC5, Entity Framework, Microservices.

Project 2: Online Marketplace Platform (E-COMMERCE)

Overview: The Online Marketplace Platform is a web-based application that connects buyers and sellers, offering a versatile platform for ecommerce transactions. It provides a diverse range of products, secure transactions, and a user-friendly experience.

Key Features:

- Vendor Listings: Vendors can list their products with descriptions, images, and pricing.
- Shopping Cart: Users can add items from multiple vendors to a single cart for checkout.
- Payments: Integration of secure payment gateways for safe transactions.
- Reviews and Ratings: User-generated reviews and ratings for informed purchasing decisions.
- Vendor Dashboards: Vendors have access to sales data, order management, and inventory tracking.
- Search and Filters: Advanced search and filtering options for efficient product discovery

Technologies Used: HTML5, CSS3, Bootstrap, JavaScript, Angular, jQuery, Ajax,. C#, ASP.NET, Microservices,MVC5,Entity Framework.

Education

BBA(CA)/Bachelor of business application and computer applications
