Educational Details

Certified Full-Stack Java Development
from QSPIDER WAKAD

BACHELOR OF SCIENCE
IN INFORMATION TECHNOLOGY
MUMBAI UNIVERSITY (2024)

Soft Skills

Analytical | Collaborator | Leader | Adaptable

Technical Skills

- **Programming Languages:** HTML, CSS, JavaScript, Java, Python, SQL
- **Frameworks:** React, Bootstrap

Core Competencies

Agile Methodologies

Software Development Life Cycle

Restful API

Debugging

Containerization

Web Services

Microservice Design

Performance Optimization

Profile Summary

- Full Stack Developer with expertise in modern web technologies like React and JavaScript
- Experienced in integrating RESTful APIs and managing data using tools like Axios and Insomnia
- Skilled in building responsive, intuitive, and visually appealing user interfaces
- Adept at optimizing performance and ensuring seamless functionality across web applications
- Passionate about continuous learning and staying updated with the latest industry trends.

Academic Projects

Project 1: Contact Manager Application

Tools: React, Vs code, insomnia, axios library

Description : Developed a dynamic Contact Management application using React for the front-end and Axios for API integration. Utilized Insomnia for testing RESTful APIs and managed data using JSON.

Responsibilities:

- Created a responsive website using React for a smooth user experience.
- Ensured smooth CRUD operations for contact management.
- Used Axios to connect the website with a backend server for data handling.
- Tested API calls with Insomnia to ensure everything worked correctly.
- Made sure user inputs were validated and handled errors effectively.
- Managed contact information in a structured format (JSON) for easy access.

Project 2 : CarDekho - Car Management System

Tools: Java, Servlets, JSP, Hibernate, JDBC

Description : Developed a J2EE-based web application that allows users to add, edit, and manage car listings. The system includes features to handle car data, display listings, and interact with a database using JDBC and Hibernate.

Responsibilities:

- Designed and built the Car Management System using J2EE for scalability.
- Developed backend features with Java, Servlets, and JSP to manage user requests and car listings.
- Implemented database operations using JDBC and Hibernate for efficient data management.
- Collaborated with team members to gather requirements and enhance user experience.
- Deployed the application on Apache Tomcat for optimal performance.
- Maintained project documentation for future reference and development.

Academic Achievements

- I am Trained Kathak Dancer
- Won 2nd price in group dance in college competition.
- NSS camp Certificate
- Award in personality contest in college
