As a Full Stack Engineering Analyst at Accenture, I've spent the past 3 years specializing in .NET development. My expertise lies primarily in back-end technologies, where I've designed, developed, and deployed web applications that are efficient and user-focused.

PROFESSIONAL EXPERIENCE

Accenture, Pune, Maharashtra

January 2024 - Present

.NET Engineer

- Led the .NET team in solving production bugs for all client projects, achieving a **95% resolution rate**.
- Worked with all the teams for providing build failure free production builds on every Wednesday.
- Worked on debugging production level bugs using Azure Application Insights.
- Worked with SQL team for any of the data related issue at production level.
- Implemented short enhancements alongside providing production support, resulting in a **25% improvement** in overall team performance.

Accenture, Pune, Maharashtra

August 2024 - December 2023

.NET Engineer

- Implemented .NET Core solutions with CQRS for efficient command and query separation.
- Developed optimized queries and read-side components, supporting microservice architecture.
- Collaborated effectively in agile teams, facilitating microservice development cycles.
- Integrated Event Handlers for seamless Salesforce data sync using Azure Service Bus within microservices.
- Architected microservices for scalable, modular application design with CQRS pattern.
- Customized Zoom API endpoints for seamless integration with .NET applications **reducing time taken** to create the events **by 50%**.
- Used version control systems like Git, ensuring code quality and collaborative development.
- Developed and maintained database objects including stored procedures, triggers, and views, ensuring efficient data retrieval and manipulation.
