- Typescript
- Angular Cli Material Angular
- REST Api
- ADO.net
- MSSQL
- CSS Bootstrap (for basic designing both inline and class files)
- HTML, XML, and JSON (for reading and writing request responses across multiple APIs)
- REST
- SOAP
- GitHub
- Clickup
- Jira

WORK EXPERIENCE

Bar Code India (BCI) <https://www.barcodeindia.com>

2022 - Present

Senior Software Engineer

Role: Frontend and Backend Development, along with DB Administration.

- Working for approximately 10 different clients (similar/multiple domains).
- All developments for the backend and frontend, including API's, are done in an efficient way to speed up the work process.
- Along with other projects, I am also working as a Lead Developer on the company product (Pharmission), a pharma-based system that includes all processes and steps of pharma production from start to finish (Warehouse Management, Production, Finished Goods Delivery).
- I have worked on multiple domains, such as Segmentation, Manufacturing, Pharma, Track and Trace, etc.
- All of the developments done using .NET Core, Entity Framework, C#, MVC, JS, Angular CLI, TypeScript, and MSSQL.

Special Achievement:

- I worked as a Lead Developer for the company's biggest system, Pharmission, and received the award for best performance within eight months of joining.
- Received Award from organisations:
- **"Going Above and Beyond" – April'22 – Sept'22**
- **"Exemplary Expertise" – April'24 – March'25**

Major clients worked with:

- | | | |
|----------------------|--------------|--------------|
| • Toyota | • Microtek | • Tata |
| • Ajanta Pharma | • LAPP India | • GX Group |
| • Piramal Healthcare | • ITD | • Hero India |

Atharva Infotech Pvt. Ltd <https://www.atharvainfotech.com>

2016 – 2022

Senior Software Engineer

Role: Frontend and Backend Development, along with DB Administration.

Website Development with Multiple APIs and Maintenance (Domain: Travel & Tourism).

- Working for approximately 20 different clients worldwide through direct communications.
- Good at detecting issues quickly, and solving them in advance.
- I worked in WCF for the initial two years and later upgraded to Web API.
- Since working in the travel tourism domain, I have connected and worked with different suppliers (API providers) for various services, such as flights, hotels, transfers, insurance, packages, etc.
- Integrating APIs of major LCCs, TBO, Indigo, Air Arabia, etc. and other airlines, including GDS connectivity such as Galileo, Amadeus, etc.
- Connected over 10 different payment gateway services, including Amazon Payment Services, PayU, Network International, etc. Tune Protect Travel Insurance.
- All of the developments done were in .NET C#, MVC, and JavaScript. Later on, I upgraded projects to AngularJS, started working with it, and used SQL for databases.

Special Achievement:

- Developed the first-ever B2C system in the current firm and later combined it with B2B so that both users can use the same system.
- Combined different services like hotels, transfers, tours, ground handling, and developed a combined package system.
- Worked as a Lead Developer along with the team, and the team received the **Star Performance Award of the Year**.

Major clients worked with:

- | | | |
|-----------------------------|----------------------------|--------------------|
| • Ottila Internationals | • Akbar Travel and Tourism | • Ibyta Travel LLC |
| • HotelRack | • Orchid Global | |
| • Uranus Travel & Tours LLC | • Eihab Travel LLC | |

Payment Gateway certification and integration

- | | |
|---------------------------|--------------------------|
| • Amazon Payment Services | • Network Internationals |
| • PayU Money | • Thawani |
| • Payu Biz | |

• Leading Flight Integrations

- | | | |
|--------------|-------------|----------------|
| • TBO | • Emirates | • GDS: Amadeus |
| • Indigo | • Fly Dubai | • Galileo |
| • Air Arabia | | |

PROJECTS

TOYOTA Kirloskar Motors

RFID Impementaion along with Supplier GRN Mappings

- Worked as a lead developer with techs MVC C# and frontend in Angular
- SAP integrations implemented
- RFID portals connected through Comservers and implmented in whole Production Plant
- Currently Ongoing Project

Ajanta Pharma, Piramal HealthCare

(Leading pharma companies in India.Web Project of whole Warehouse management of a Plant which contained all steps starting from receiving Raw materials from vendors to making a medicine and and getting ready for dispatch.)

- Worked as a Lead Developer in this project which is also company's own Product (Pharmission)
- Frontend was in Angular and for Api we used .net Entity Framework.
- Including SAP integrations in our Api's.
- Later on Managed the project on own which included regular client interactions and requirement understanding.
- Received an award for my prompt contribution to this product n very less time.

Tata / ITD Segmentation:

(Tata group is conducting the construction of Metro in Chennai, they required a Segmentation application which would keep a track of every individual segment used in construction along with its recieving history to implemented place)

- Worked as a supporting Developer for API's for this Android application project.
- Proper validation through API's were handled and returned to app as required using Asp.Net

HERO Motocorp

(One of the Leading Motorcycle production company in India. This project was basically a Track and Traceability project wherein all the components in a Bike were scanned before sending to production Line, and later after production maintaining its inventory and dispatch according to its locations and Plants.)

- Worked as a Lead API developer in this and had designed web forms using Material Angular for frontend and c# for API
- SAP Rfc's implemented at many points since inventory was supposed to be maintained parallely in SAP and our end.
- Regular interactions for requirement understanding with client.

Microtek India,Luminous

(Leading electronic component manufacturer in India.This project consisted of Warehouse management of production of different electronic components such as Invertors,DeepFreezers,etc)

- Worked as a supporting developer along with the team.
- Material Angular,Typescript was used for frontend and Entity Framework along with regular .net framework using stored procedures for Api.

Ottila Internationals,Hotel Rack

(These are from Travel and Tourism domain.B2B system used by agencies across globe for bookings of Hotels transfers and Sightseeings)

- Initial development was in MVC later upgraded to Angular.
- Connected almost 10 supplier Api's for different services.
- Developed an individual service of Packages by combining individual services of existing system.
- Around 10 different leading Payment Gateways connected like PayuMoney,PayBiz,Thawani,RazorPay,etc.

Uranus Travels LLC,Eihab Travels LLC,Ibyta LLC,Akbar Travels

(Travel and Tourism domain based companies from Middle East)

- Developed and managed whole system together
- Development was done in Asp.net, webforms and later upgraded to Angular.
- I had connected around 10-15 different Flights suppliers like TBO,Amadeus,Indigo,AirIndia,Air Arabia,Fly Dubai,Emirates,etc.All certifications and qualifications done and managed individually.
- Connected a travel Insurance API for the first time in B2B+B2C system
- Developed first ever B2C system in the organisation by combining it together and maintaining it along with the existing B2B system.
- Also got Awarded as a Star performer for the same.
