Hindi

## Projects

### Future AI

**Description:** Developed AI modules integrating advanced tools like ChatGPT, MeshyAI, and Novita AI to enhance intelligent system functionalities. Contributed to building scalable solutions for predictive analytics, decision-making, and interactive AI-powered interfaces.

**Technologies Used:** Laravel, AI APIs, Web Services

### Whatsnap

**Description:** Designed and implemented a **WhatsApp Bulk SMS** solution, enabling efficient communication for businesses through automated messaging systems. Focused on user-friendly interfaces, message scheduling, and secure delivery mechanisms.

**Technologies Used:** Laravel, WhatsApp API, JavaScript

### eVoting

**Description:** Developed an **Online Voting System** offering a secure and transparent platform for election processes. Key features included voter authentication, real-time vote tracking, and an admin module for election management.

**Technologies Used:** Laravel, Bootstrap, MySQL

### Base Project

**Description:** Designed an **Admin Module** with AI capabilities to serve as a foundation for multiple applications. Included dynamic role management, analytics dashboards, and integration of AI tools to enhance operational efficiency.

**Technologies Used:** Laravel, AI APIs, MySQL

### Hotel Management System

Developed a feature-rich system enabling user login, online booking, real-time room availability, room categorization, automated inquiry emails, and an admin dashboard for efficient management.

**Technologies Used:** Laravel, Bootstrap, MySQL
