PROJECTS

Mahindra & Mahindra Farm Dealer World JSP to Angular Migration **June 2024 - Sep 2024**

- Working on Mahindra & Mahindra Farm Division project on different Modules like- **Job Card, Job Card Invoice, Implement Job Card** and **Implement Job Card Invoice**.
- Its a Migration Project From JSP To Angular 8.
- The complexity of the project is there are different scenarios in which the servicing of the tractors is happened, so we handles the different flows of the particular module.
- I personally Worked on the job card invoice page which is generated after the job card service is regular closed.
- Technology used: HTML, CSS, JavaScript, Typescript, Angular 8
- Backend Technology: Java

Logistic Management system(LMS) **May 2023 - May 2024**

- LMS-Logistic Management System is a web & mobile application which is used in logistic for the tracking & management of the vehicles.
- I am worked on LMS as a junior developer and working on front end framework of Angular
- Working on various features (re-design, enhancement, bugs finding, API Integration, production work) with my team in modules like-Masters, Booking, Billing, Accounting, Tracking, Reports and Maintenance.
- I am also working on its mobile version or web lite version due to its lite version its increases the usability of the product , in which angular 12 version is used.
- It's a live project and customarily according to the client use; I'm working on the major 6 client project with Quality Assurance to get new pages/product tested and resolve any issue within 24 hours.

- I also Handle 6 interns which is working on our internal project PMS.
- Technology Used: Frontend- HTML, CSS, JavaScript, Typescript, Angular JS, Angular 12.
Backend- Node JS

Project Management System(PMS)

Nov 2022 - May 2023

- PMS- Project management System is a web & mobile application which is our internal project used for the management of different projects
- Project is also working on angular so I developed many features with my team like – Task management, Issue Management, Scrum View, Attendance(Check-In &Check-out),Leave Management, User Role.
- With the help of this project the working efficiency of our team was enhanced 2x times.
- Technology Used : Frontend- HTML, CSS, JavaScript, Typescript, Angular 12 Backend-Third Party

E-Commerce Website (Personal Project)

- This is Basically a E-commerce website like a Amazon & flipchart.
- I this project i made different Modules like Sign-up for both seller & customer , Product List Add Product, Add to cart, order Summary and Cancel Oder.
- In this project Seller sign up and add product to the product list for the sell ,customer sign up and add product to the card buy product which generate order summery and cancel order feature is also available.
- Technology Used : Frontend- HTML, CSS, JavaScript, Typescript, Angular 16 Backend-JSON-server API

SKILLS

- Front-End Technologies: HTML, CSS, JavaScript, Typescript, Angular JS, Angular 2+
- Back-End Technologies : Node.js
- Database Systems : Mongo DB
- Version Control: Git
- Git Hub Tools: Visual Studio Code, JIRA
- Other: Responsive Web Design
