Sibasankar Gauda

Data Analyst

Professional Summary

Detail-oriented Data Analyst with expertise in SQL, Python, and Power BI. Adept at translating business needs into actionable data insights and creating compelling visualizations. Demonstrates strong problem-solving skills and learning agility with new technologies, including Generative AI, for rapid adaptation.

Projects

Market-Matrix [Github Repo Link](#)

Power BI Python MySQL

- Conducted comprehensive financial data analysis using Yahoo Finance data.
- Created and managed SQL schema, and handled data uploading to MySQL.
- Imported MySQL data into Power BI for further analysis and dashboard creation.
- Performed data cleaning to ensure accuracy and reliability of the financial insights.
- Designed interactive dashboards to track and visualize stock price trends.

NIFTY50_Stock_Price_Prediction [Github Repo Link](#)

Python MySQL

- Developed a robust model using four years of historical data to predict NIFTY-50 stock prices.
- Enabled flexible user inputs for stock preference, quantity, and transaction dates.
- Integrated with Google Sheets for enhanced user convenience and detailed portfolio analysis.
- Facilitated accurate future price forecasting and historical data analysis for investment returns.
- Provided a powerful tool for investors to make well-informed decisions based on data insights.
