Percentage: 90.20 %

Academic Projects (Feb 2023-Nov 2023)

Library Management System(LMS).

- Developed a robust Library Management System (LMS) using Python and Django, featuring a user-friendly interface for efficient library administration. The system includes comprehensive user management, category and subcategory management, book management with ISBN integration, student information tracking, and borrowing transaction management.
- As the lead developer for the Library Management System (LMS) project, I played a pivotal role in designing and implementing the system architecture, overseeing backend development with Python and Django, and crafting responsive frontend interfaces using HTML, CSS, JavaScript, and Bootstrap v5.
- Technology used: Python, Django, SQLite3, HTML, CSS, JavaScript, Bootstrap v5

Employee Management System.

- Developed comprehensive Employee Management System using Core Java with Swing and AWT for the user interface to store all the employee's information into the database. Implemented the features for admin to add, view, update and remove the records of the employees.
- My role involved designing and developing the system using Core Java, Swing, and AWT. I led the creation of an intuitive user interface, incorporating Swing and AWT for enhanced user experience. Integrated MySQL for efficient storage and retrieval of employee records.
- Technology used: Core java, Swing and AWT for graphical user interface, MySQL.

Skills

- Programming Language: Java, Python
- Database: MySQL
- Development: HTML5, CSS, JavaScript, Bootstrap v5

Extra-Curricular Activities

- Actively participated in college cultural events and sports
- Certified Proctor-Attended 3-day internship in Splashgain Technology Solutions Pvt Ltd at World Peace University, MIT College, Kotharud.
