- Ability to learn quickly and apply new skills to existing problems.
- Completed "Certified Professional in Advanced Programming" from IIT Madras.

Personal Details

Date of Birth : 29/05/1998

Marital Status : Single

Projects

E-com Esnc

An eCommerce website project involves creating a web platform that allows users to purchase products from a virtual store. Initially, it displays the category of products, after selecting the required category it will redirect to products associated with that category. Where we can add the product to the Wishlist or we can add it to the card we can check the size, quantity, and product details, after that we can choose the shipping and billing address and can place the order. It also has the functionality to add coupons if the coupon is valid, it will be applied to the product. And finally, you will get a success message for your order.

MedAssist

Developed a virtual health assistant web application. Implemented features such as symptom checker, appointment booking, medication reminders, telemedicine integration, and health records management.

Ensured compliance with healthcare data privacy and implemented robust security measures for protecting users' personal and medical information.

Designed a user-friendly interface and integrated community forums for user engagement and support.

Received positive feedback from users for the application's usability and effectiveness in managing their healthcare needs.

Collaborated with a multidisciplinary team including developers, designers, and healthcare professionals to deliver a comprehensive healthcare solution.

CERTIFICATE

-  Completion of master Data science program from guvi (IIT Madras research park)
-  Data visualisation with Power BI from great learning academy.
-  Data visualisation with Tableau from great learning academy.
-  "Certified professional Advanced programming" from IIT Madras.
