Objective

To acquire a challenging position in a globally reputed firm that would allow me to develop my skills against new challenges and help me gain new knowledge and experience, while contributing to organizational goals

Experience

- **Gravitech Software Solutions**

1/11/2021 - 28/2/2023

Project Title: Share Market Application

Role/Position: back End Developer as a team Member

Company/Organization:
Gravitech Software Solutions Pune

Responsibilities:

Worked on Web applications, actively involved in bug resolution and feature additions.
Demonstrated proficiency in debugging and enhancing the functionality of applications to meet evolving requirements.

Technologies/Tools Used:
Asp . net core Mvc ,Web Api , SQL ,C#

- **Beehive system private limited (WASPSS 3D)**
Software application engineer

01-04-2023 - 31-07-2023

Project Title:Central Configure machine(Broad Casting Product)

Role/Position:
back End Developer as a team Member

Project :-

Before project when we launch our product then manually All details are filed by every computer so that's why we developed the one more advanced technology/Technique when we launch new product then automatically fill the data use one machine and all data fill on 100 machine

Company/Organization:
Beehive System Pvt Ltd Noida

Responsibilities:

- Worked on Windows applications, actively involved in bug resolution and feature additions.
- Demonstrated proficiency in debugging and enhancing the functionality of applications to meet evolving requirements.

Technologies/Tools Used:
C# (window application Software so only used C#)

Challenges Overcome:

When the problem came with the code I found out different solution and use one of the best solution and easily access the code when I stuck any problem didn't solve my side then I approach from my senior team members

Result/Outcome:

When we complete the project then full man power was reduced because before complete the task 100 members were required after complete only one person is required so cost saving and time saving .
one machine operate 100 machine

Education

- ♦ **Center for development of advance computing Noida**
