SUMMARY

Software Engineer with 1.6 years of experience in azure integration (dot net) . I've gained experience working with a variety of languages and frameworks, including C#, ASP.NET and SQL Server. I've also honed my skills in agile development methodologies, team collaboration, and problem-solving, allowing me to deliver projects on time and within budget.

EDUCATION

Pune University, Maharashtra, India
Bachelor of Engineering

July 2016 – Jun 2021

SKILLS

-
- **Languages:** C#, HTML, CSS
 - **Programming Skills:** .NET, ASP.NET, .NET CORE, Core Java ,TSQL , Oops
 - **Tools :** Visual Studio, Postman ,MS Azure, Snowflake, AWS
 - **Databases:** Microsoft SQL Server, SQL
 - **Soft Skills:** Analytical & Logical Reasoning, Problem Solving, Attention to Detail, Communication, Collaboration, Adaptability, Time Management.

PROFESSIONAL EXPERIENCE

Associate Consultant , Atos Syntel

May 2022 – June 2023

- Azure,C# and .NET Framework: Strong understanding and experience in C# programming language and .NET framework.
- ASP.NET MVC and Web API: Proficiency in building web applications using ASP.NET knowledge and on Web API.
- Front-end Technologies: Familiarity with HTML, CSS, JavaScript.
- Database System: Experience in working with database system such as SQL Server.
- Entity Framework: Proficiency in working with Entity Framework to access database.

PROJECTS

1 NEST:

- Requirements gathering from user stories, check the implementation type.
- Formalize as frontend API, Determine what frontend REST API is required. API design according REST principals.
- Determine the frontend to backend API mapping , Data mapping Design.
- APIM Policy usage design, Candidate frontend API test design (based on API test scripts and APIM policy usage design.
- Publish secured API, securely connect and authenticate to backend API/endpoint.
- Logging and monitoring for API entries.
- We make the developers portal and the API documentation most attractive for intended users.

- Developer portal design, Attractiveness/UX, stop documentation and fields.
- Business logic functionally is provided by backend APIs ,Adapt backend testing scripts from other teams to include integration teams changes and apply them to frontend APIs.
- Error handling is included in the API contracts, errors and detail Error codes need to be delivered by the backend APIs. Integration team changes based on(Policy ,SOAP, UI, Postman Tool)
- Changes based on Policy (Policy, Designs by the integration team).
- Involved in attending defect call.
- Responsible for validation of data through the SQL.

2 AEGON:

- Snowflake Development- Analysis creating Cloud based Snow pipes ,Streams, Tasks, Views, and Procedures.
- Created complex SQL and Snowflake queries for efficient data ingestion, resulting in faster and more accurate data processing.
- To extract data from sources and seamlessly send it to designated endpoints ,ensuring smooth data flow and integration.
- Successfully ingested datasets into the Snowflake system, developed & maintained Snowflake validations to verify the accuracy and integrity of the ingested data, enhancing data quality &v reliability.
- Proficient in working with different data formats such as JSON, XML, CSV, etc., enabling efficient data processing and manipulation.
- Proficiently utilized tools such as AWS, working on IAM, S3 Bucket , EC2, familiar with AWS tool

CERTIFICATE :

-
- Microsoft Certified Azure Fundamentals (AZ-900)
 - Snowflake Certificate
