## Education

**Data Analyst**  
Masai School  
August 2024-present

**MCA**  
Chandigarh University  
August 2022 - May 2024

## Technical Skills

- Microsoft Excel   Power BI  
MySQL   Machine Learning

## Soft Skills

- Adaptability   Teamwork  
Problem Solving

# Ankit Kumar

## Data Analyst

### Professional Summary

Detailed-oriented and adaptable Data Analyst with expertise in Python, SQL, and Power BI. Efficiently utilizes Generative AI to streamline processes and swiftly adapts to new technologies. Skilled in data visualization and communication, delivering actionable insights for enhanced business strategies and decision-making.

### Projects

**Black Money Transaction Analysis** [Live Demo](#) [Github Link](#) [Repo Link](#)

Jupyter Streamlit

- Collaborated with a team to develop a Streamlit app for analyzing and visualizing suspicious financial transactions.
- Implemented data cleaning and exploratory data analysis (EDA) to prepare high-quality datasets for analysis.
- Created interactive visualizations including heatmaps and trend graphs to effectively communicate insights.
- Integrated anomaly detection techniques to identify and flag high-risk transactions.

**HR Analytics** [Github](#) [Repo](#) [Link](#)

Jupyter MySQL Power BI

- Developed a Power BI dashboard integrated with MySQL for real-time HR analytics, enhancing data visibility.
- Automated data cleaning processes and SQL data integration using Python, ensuring seamless updates and accuracy.
- Provided actionable insights on attrition, employee satisfaction, and department performance to inform decision-making.
- Designed demographic and job role-based visualizations to support effective HR decision-making processes.
- Collaborated with a team to enhance data quality, integrity, and availability, contributing significantly to project success.
