Time Management

Attention to Detail

Teamwork

Muskan Patel

Professional Summary

"A careful and skilled Software Development Engineer in Test (SDET) with strong expertise in testing, specializing in finding and fixing logical and algorithmic errors. Good at problem-solving, writing clear documentation, and creating test scenarios. Works well with teams to ensure software quality. A fast learner and creative thinker, using AI to quickly adapt to new technologies."

Projects

Automation Testing of Bewakoof

[Github](#)

E-commerce Website(Selenium)

[Repo](#)

[Link](#)

Java Selenium TestNG

- Developed thorough test scenarios and test cases for essential e-commerce functionalities.
- Used Selenium for automating key features such as product comparison, user login, and category navigation.
- Collaborated closely to ensure the efficiency of the automation with TestNG and Java.

Tutorial Ninja E-commerce
