ER RASHMI BHAVSAR

LINKEDIN PROFILE

https://www.linkedin.com/in/rashmibhavsar

OBJECTIVE

To contribute to a challenging and intellectually stimulating environment that provides opportunities for professional growth based on merit and dedication.

SUMMARY

A results-oriented and optimistic individual who embraces challenges and thrives in environments that encourage stepping outside of one's comfort zone. Adept at quickly learning and understanding new concepts, with a demonstrated interest in exploring emerging technologies. I am a self-motivated and enthusiastic individual who views challenges as opportunities for growth and innovation.

PERSONAL INSIGHT

A highly adaptable and quick learner who thrives in collaborative environments. I enjoy working as part of a team and actively encourage cross-functional collaboration to find effective solutions. I value and maintain a respectful and professional demeanor. I am a self-motivated individual with a strong drive to achieve my goals, maintaining a positive attitude and openness to new experiences. I possess strong interpersonal and teamwork skills, coupled with analytical, problem-solving, and creative thinking abilities. I am also proficient in documentation and possess strong time management skills, including the ability to accurately predict timelines.

EXPERIENCE

MobileFirst Applications | Fintegrations

July, 2023 - Present

Web Developer
Managing a diverse portfolio of software projects, encompassing development, testing, and all intermediate stages. Thriving in the fast-paced environment, continuously expanding my skillset through exposure to emerging technologies and adapting to dynamic project timelines while consistently delivering high-quality software development work.

D3 Systems

November, 2022 - July, 2023

Software Engineer
Contributed to the software development and testing lifecycle for complex, multi-layered projects for UK-based clients, leveraging a range of advanced technologies.

Sparken IT Solutions

December, 2021 - November, 2022

Jr PHP Developer
Developed core PHP backend functionalities for e-commerce websites. My foundational software development skills encompassed a range of essential technologies and languages.

PHP projects.

PROJECTS

SANINC - Star Talent

The project is a specialized job-hunting platform designed for
seamless connections between candidates and hiring managers,
with a focus on the metals and plastics industries. It features an
intuitive system where candidates can showcase their skills, hiring
managers can efficiently find top talent, and an admin ensures
smooth access control for all users, streamlining the recruitment
process in these niche sectors.

Technologies: Laravel, PHP, React, MySQL

Roles & Responsibilities: Logic Design and Implementation,
Backend & Frontend Development, Bug Fixing, Testing

Dealer Commander

A complex, multi-module e-commerce solution designed for the
online sale of office equipment. It features granular access control
with distinct administrative and user roles and permissions. The
system integrates comprehensive warehouse management, order
processing, and all related functionalities to support a seamless
end-to-end shopping experience.

Technologies: Core PHP, MYSQL, JAVASCRIPT, jQuery, AJAX

Roles & Responsibilities: Backend Development, Bug Fixing

Pizza Paradiso & Broadway Grill

This platform offers both online food delivery and restaurant
reservation services. Administrators have access to a customizable
interface, allowing them to manage and configure the user-facing
experience.

Technologies: Core PHP, MYSQL, JAVASCRIPT, jQuery, AJAX,
Postman API

Roles & Responsibilities: Backend + Frontend Development, API
creation, Bug Fixing

Commusoft

This complex project comprised several modules, with my focus
being on integrations. My primary responsibility was developing the
integrations module, which involved connecting various third-party
applications (e.g., Zapier, Pipedrive, GoCardless) to the Commusoft
platform, making their functionalities accessible to users.

Technologies: Symfony, Doctrine PHP, MYSQL, REST APIs,
RabbitMQ and Gearman workers

Roles & Responsibilities: Backend + Frontend Development, API
creation (major contribution in Zapier integration), Bug Fixing,
Manual Testing

Who's Got Game

This project involves the development of a social media platform similar to Instagram, incorporating features such as follower/following relationships, connection requests, and post creation with a "like" functionality.

Technologies: Wordpress, PHP, MYSQL

Roles & Responsibilities: APIs creation, Software developments revolving around PHP, MYSQL changes

Age Verification System

This project, an age verification platform, facilitates the process of confirming user age through document upload, review (including acceptance or rejection), and subsequent user profile creation.

Technologies: Laravel, PHP, Postman APIs, HTML + CSS, MYSQL

Roles & Responsibilities: Backend + Frontend Development, Bug Fixing, Testing

RatnaaFin

This project involves the development of a FinTech service for a banking system, enabling users to generate legal documents (PDF/DOC) based on provided information related to a chosen legal process. The system also stores the generated documents and associated data within a database.

Technologies: Docassemble, Jinja, PostgreSQL

Roles & Responsibilities: Project Planning, Backend + Frontend Development, Bug Fixing, Testing

BrandFactors

This project involves the development of a SaaS CRM platform designed to automate key operations by leveraging user-provided data. A core feature is the ability to efficiently generate multiple legal documents from collected user information, enabling on-demand document creation by users or administrators. This solution required the integration of diverse technologies.

Technologies: Docassemble, Jinja, PostgreSQL, Python, Flask

Roles & Responsibilities: Project Team Leadership, Logic Design and Implementation, Backend Development, Database Structure Design

EDUCATION

Sinhgad Insitutes

`2021`

BE in Computer Science
7.38

EXTRA-CURRICULAR INVOLVEMENTS
