EDUCATION

Software Development Engineer in Test
Masai, Bengaluru
February 2024-present

Diploma in Elementary Education
Mother Teresa Mahila Mahavidyalaya, Sultanpur
August 2018 - April 2021

Bachelor of Science
Ram Nevaj Singh Mahavidyalaya Bana Kumarganj, Faizabad
September 2015 - May 2018

TECHNICAL SKILLS

Manual Testing | Selenium | BDD, Cucumber, TestNG | Mobile Testing | API Testing | Performance Testing | Java | SQL | HTML | Python

SOFT SKILLS

Problem Solving | Effective Communication | Adaptbility

INTERESTS

- Cooking
- Traveling

CERTIFICATIONS

SQL (Basic) 🔗
HackerRank
I completed basic and intermediate SQL problem-solving challenges on HackerRank, demonstrating a practical understanding of SQL queries. I applied knowledge in Structured Query Language to solve diverse problems, enhancing proficiency in database querying and analysis.

PROFESSIONAL SUMMARY

Energetic SDET/QA with expertise in manual testing, Selenium, BDD, and API validation. Well-versed in Python, capable of using Generative AI for efficient problem-solving and adaptable to new tech stacks swiftly. Detail-oriented with strong problem-solving and effective communication skills for high-quality software assurance.

PROJECTS

1. ApTech Application (Manual Testing) | ⌽
Excel Sheet | XMind Map Tool
- Created comprehensive test scenarios and test cases for critical functionalities such as login, logout, search, and add to cart.
- Authored detailed test cases to ensure complete coverage of user interactions and system behavior.
- Collaborated with the development team to identify and resolve issues.

2. Page Object Model | ⌽
Selenium Scripting | Java | TestNg | Page Object Model (POM)
- Implemented the Page Object Model (POM) design pattern to create an object repository for web elements, enhancing test maintainability, readability, and reusability.
- Developed and executed automated test scripts for key functionalities, including searching, adding to cart, and scrolling.
- Utilized TestNG for test execution and reporting, ensuring efficient and organized test management.

3. Dummy JSON API (Rest Assured) | ⌽
Java | RestAssured | API Testing | J son
- Developed CRUD operations (GET, POST, PUT, PATCH, DELETE) for RESTful services using DummyJSON API to demonstrate proficiency in API testing.
- Enhanced skills in API interactions and web service testing through this project.
- Showcased advanced techniques in implementing and testing RESTful services.
