PROFILE OVERVIEW

Dedicated and results-oriented professional with 1.9 years of hands-on experience in software testing, adept at ensuring the quality and reliability of software products. Eager to transition into the .NET development field, leveraging a strong foundation in C#, .NET, .NET Core, MVC, ASP.NET, MS SQL Server, API , HTML, and CSS. Passionate about staying updated with emerging technologies and committed to continuously enhancing skills to drive innovation and success in .NET development.

EDUCATION

Pune University, Maharashtra, India.   **Jul 2016 –Jun2020**

Bachelor of Engineering.

SKILLS

- **Programming Languages**: C#, .NET Framework
- **Web Technologies**: HTML, CSS, JavaScript, ASP.NET
- **Database Management**: Microsoft SQL Server, Entity Framework
- **Development Tool**: Visual Studio
- **Soft Skills**: Analytical & Logical Reasoning, Problem Solving, Attention to detail, Communication, Collaboration, Adaptability, Time Management

PROFESSIONAL EXPERIENCE

Associate Software Engineer, Icertis Solutions Pvt Ltd.   **Oct 2023 –Present**
- Conducted testing on the product named ICI (Icertis Contract Intelligence).
- Performed functional testing on the product by executing test cases.
- Collaborated with cross-functional teams, including developers and analysts, to gather application requirements, resulting in the successful delivery of a high-quality product on time and within budget

Software Engineer, Zensar Technologies   **Mar 2022–Jul 2023**
- Possess experience in the Web Application domain.
- Analyzed and validated the completeness of business requirements.
- Performed Functional Testing, Sanity Testing, UI Testing, Re-Testing, and Regression Testing.
- Proficiently wrote test cases using black box testing techniques.

PROJECTS

Book Store Application (ASP.NET Core, Entity Framework Core)
- Designed and developed a web-based bookstore application using ASP.Net Core and Entity Framework Core.
- Database Integration: Utilized Entity Framework Core for seamless integration with the MSSQL database, enabling efficient data storage, retrieval and manipulation.
- CRUD Operation : Implemented Create, Read, Update and Delete (CRUD) operation to manage book inventory, enabling administrators to add new books, update existing information, and remove outdated titles.

VW Implementation Services
- Developed detailed test cases based on requirements, functional specifications, and design documents.
- Clearly documented and communicated identified defects, providing necessary details for developers to understand and address issues.

CDAT Moonlighting
- Conducted testing on in-house application namely ICFS (Internal Customer Feedback Service), IQA (Internal Audit Tool).
- Detected end-to-end test scenarios and created corresponding test cases Participated in defect resolution calls.

CERTIFICATE
- Microsoft Certified Azure Fundamentals (AZ-900)
