Education

Full Stack Web Development
Prepleaf By Masai School
February 2023 - February 2025

Technical Skills

Python Node.js JavaScript React Java

Soft Skills

Teamwork Problem Solving Effective Communication

Achievements

Peace The Code 🔗
Secured 2nd rank in 'Peace The Code' national-level competitive programming competition

Zoom Marathon Challenge 🔗
Masai School
This 26-day journey involved consistently creating daily 2 to 3-minute videos, resulting in incredible growth and self-improvement.

Ritesh Gandalwad

Frontend Developer(React)

Professional Summary

Results-driven Front-End Developer with expertise in HTML, CSS, JavaScript and ReactJs. Skilled in implementing responsive and user- friendly web interfaces through collaboration with UX/UI designers. Proficient in Git version control. Strong problem-solving abilities and attention to detail. Adept at working in dynamic teams to deliver innovative solutions.

Projects

Support Ticket Live Demo Link Github Repo Link

React Chakra UI node json server

- Developed a robust support ticket system using React and Chakra UI, ensuring a seamless user experience.
- Implemented authentication via Reqres API, enabling secure access to the application.
- Used React Router DOM for private routing, restricting access to protected routes.
- Managed backend data with node-json-db, allowing efficient data storage and retrieval.
- Designed responsive interfaces to provide optimal performance across different devices and browsers.

Weather App Live Demo Link Github Repo Link

JavaScript HTML5 CSS3

Responsive Web Design Git

- Developed a responsive web application to display real-time weather details using JavaScript, HTML5, and CSS3.
- Integrated an external API to fetch and display up-to-date weather information.
- Implemented a user-friendly interface to present weather data efficiently, enhancing user interaction.
- Ensured optimal performance and responsiveness across various devices and browsers.
- Utilized Git for version control, ensuring collaborative development and code quality.
