Dhruv Garg

Software Development Intern (Backend Focus)

Professional Summary

Dynamic final-year B.E. student with a focus on backend development and capabilities in Java, JavaScript, and MERN Stack. Skilled in problem-solving, teamwork, and adaptability. Proficient in using Generative AI and quickly learning new technologies. Keen to design efficient backend solutions and optimize application logic.

Projects

Fruit.ai - Fruits Detailed List Website   Github Repo Link

- Collaborated on the development of backend components, optimizing application logic and database interactions.
- Integrated Google Translate API, enabling seamless multilingual support for users.
- Implemented and optimized API integrations to support the AI-powered chatbot for real-time user assistance.

Story Stream-BlogWebsite   Live Demo Link   Github Repo Link

- Developed a dynamic blog platform using the MERN stack, ensuring efficient backend logic and integration.
- Designed an admin panel with backend components for efficient content management, enabling real-time modifications.
- Collaborated between frontend and backend segments to ensure smooth user experience and real-time feature updates.

To-Do List   Github Repo Link

- Collaborated with the backend team to optimize database interactions for task management features.
- Addressed performance bottlenecks by optimizing backend processes for collaborative task sharing.
- Worked closely with frontend components to ensure seamless integration and user functionality.
